Gaming

Pass Go, Collect Floor Share

In this note we preview the upcoming results for Aristocrat and Light & Wonder (LNW), as well as provide an update on various industry movements and datasets.

Based on US Slot GGR data and casino read-throughs, the US macro has thus far remained robust despite concerns about petrol prices arising from the Iran war. Although we expect a softer 1Q for casino capex, casinos continue to invest in their slot floors as they see the benefit from top-performing games. The launch of VGTs in Chicago (likely in 4Q26) also presents another expansion opportunity, in which both ALL and LNW should capture material share.

We believe the recent AI sell-off has been overdone for both companies. The land-based segment in particular is insulated by the licensing, hardware, game data and relationship requirements necessary to achieve scale. We have nonetheless lifted both companies' discount rates slightly to reflect the longer-dated risk, with the impact mostly reflected in Social Casino and to a lesser extent iGaming.

Aristocrat (Positive recommendation, $62.56/sh valuation)

Wednesday 13th May (Link)

We are marginally ahead of consensus for Aristocrat's 1H26 result. Our biggest outlier is North American net adds, where we have a greater skew to 2H primarily due to the cadence of game releases, which we previously flagged in our prior quarterly preview (see here).

The headline release in 2H is Monopoly Big Board Bucks. The game has begun hitting casino floors with significant hype, although early performance data is not yet available. Of Aristocrat's other recent releases, Bao Zhu Zhao Fu Firecracker Express has surprised to the upside, Spooky Link Grand has drawn mixed leasing interest, and Lightning Link 10 Year Storm has had a softer start than recent top-tier launches. Beyond the result, Aristocrat's Investor Day in July will be a key catalyst — particularly for visibility on the path to their US$1bn 2029 Interactive target.

Light & Wonder (Positive recommendation, $230/sh valuation)

Thursday 7th May (Link)

We are broadly in line with consensus for LNW's group headline numbers but differ materially on key line items. We are well above consensus for Grover net adds, driven by the faster-than-expected ramp of e-Pull Tabs in Indiana. Conversely, we are well below consensus for ex-Grover net adds, reflecting the brought-forward impact of the NYC conversion, which we also previously flagged in our prior quarterly preview (see here).

The current period is otherwise something of an offseason for LNW game releases relative to Aristocrat. However, Ultimate Fire Link Triple Nova continues to add units, and although the individual game performances on the Lightwave cabinet have been below expectations, the cabinet itself has still been incremental to LNW's install base.

Top New Games

In our prior quarterly preview in November (see here), we discussed the G2E feedback that we had from casino operators about he best new content on display. For LNW, these games have been available for some time and were discussed in our February quarterly preview (see here). However, for Aristocrat these have all hit casino floors in the last few months and form the bulk of what we will analyse in this section. These games include:

- Monopoly Big Board Bucks
- Lightning Link 10 Year Storm
- Spooky Link Grand
- Bao Zhu Zhao Fu Firecracker Express

Based on our industry feedback, we viewed each of the top three games listed above as having strong potential to succeed of any Aristocrat game release since Phoenix Link in Oct-24. In particular, Monopoly has been arguably the most hyped game release post covid, rivalled only by NFL & Phoenix Link. The fourth game listed above, Bao Zhu Zhao Fu Firecracker Express, was not on our radar but is worth highlighting given its initial performance.

Monopoly

In early July, Hasbro (best known for the Monopoly franchise) announced new multi-year casino licensing partnerships. The new licensees beginning in 2026 were as follows:

- Aristocrat – B2B land-based slots (Monopoly)
- Evolution – B2B online slots and live casino (Monopoly, Hasbro Games)
- Galaxy Gaming – B2B casino table games (Monopoly, Yahtzee, Battleship)
- Bally's – B2C online casino operator (Monopoly)

This meant that the incumbent LNW would not retain the licences for land-based and iGaming content. However, SciPlay would retain the licence for social casino.

Subsequently, Aristocrat displayed their own version of Monopoly at G2E. This surprised the industry by how quickly they were able to develop the game. Monopoly also drew incredible hype, with casino operators thoroughly impressed by the art and a brand-new sign

package (Skyline). They also noted that Aristocrat took a very different approach to LNW's Monopoly franchise by incorporating far more of the core Monopoly features into the game, rather than just the brand. Some of these include:

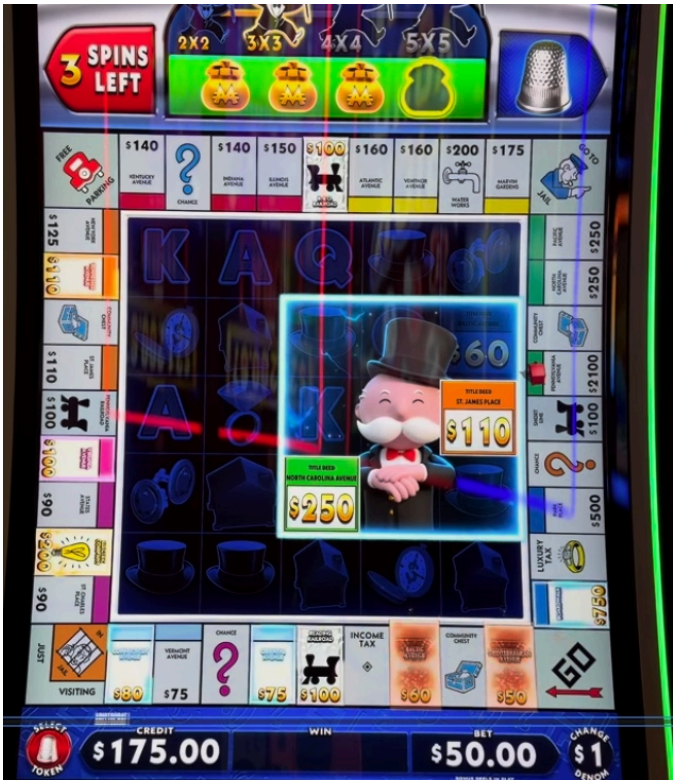

- Bonus gameplay whereby you can land on every tile of the traditional Monopoly board and accumulate each property.
  - Owning a full colour set doubles values on those properties.
  - Houses & Hotels increase the property values.
  - Railroads multiply each time another is acquired.
  - "Go" & Free Parking trigger individual bonus features that could result in winning the various jackpots.
- Player choice from the 13 classic Monopoly tokens.
  - The person below chose the Thimble (personally I would have gone Race Car or Battleship).

The game's bonus features are primarily based on the expanding square concept that was first introduced in Mo Mummy & later in Spooky Link. However, overall the game has an enormous depth that includes:

- Four progressive jackpots (Mini/Minor/Major/Grand).
- Extra spins, houses, properties.
- Hold & Spin and Wheel mechanics.

Monopoly made its official debut in mid-April, and as such has not yet featured in the Eilers game performance reports. The majority of our feedback has been that casinos operators will immediately seek to install the game, particularly as the fee per day appears to be cheaper than expected.

Exhibit 5 - Monopoly Big Board Bucks

Source: Aristocrat

A small sample of casino operators suggested that they would wait to see the performance of Monopoly before choosing to lease the game. While they did still have high hopes for its success, they noted that they had been burned before by highly anticipated IP games such as NFL.

Based on history, there appears to be some merit to this approach. Below we show the most anticipated content of the last five years and its current performance. Several highly anticipated games could be considered flops such as Dune, Big Fish Grand & NFL. Dragon Train is also no longer on casino floors due to the injunction ruling.

Lightning Link 10-Year Storm

As the title suggests, Lightning Link 10 Year Storm is the sequel released to celebrate the 10-year anniversary of the original game. The base game pioneered the revolutionary "Hold & Spin" mechanic that went on to define the next generation of slot games.

The sequel game debuted in mid-February and appeared for the first time in the most recent Eilers game performance charts. The initial dataset shows a theo win vs. zone of 2.3x per unit.

Exhibit 7 - Top Indexing New Games – Premium Leased & WAP

1st Month on the Eilers Charts

Source: Eilers & Krejcik, E&P Estimates

Although the sample is small, Lightning Link 10 Year Storm's performance is below what we have historically seen for top-ranking games. The chart below shows that we show that the majority of top games released over the past ~2.5 years have peaked in their inaugural report before trending downwards in performance.

Exhibit 8 - Premium Lease & WAP Games - Theo Win vs. Zone

Select sample of games that had a strong performance in their initial Eilers reports

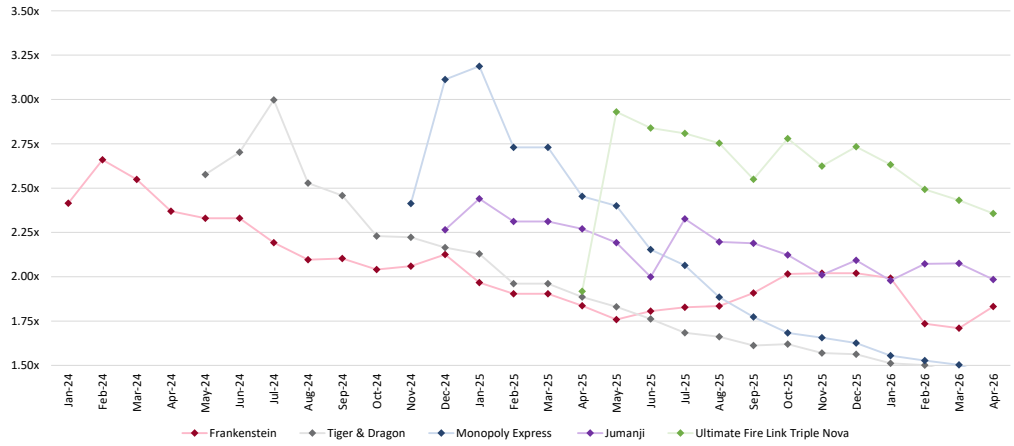

Source: Eilers & Krejcik, E&P Estimates

However, there are some instances of games showing performance uplift after their first month, which we have shown below. By next month, we expect to be able to make a much higher-conviction call.

Exhibit 9 - Premium Lease & WAP Games - Theo Win vs. Zone

Games shown above that had a stronger performance on their 2nd inclusion on the Eilers reports

Source: Eilers & Krejcik, E&P Estimates

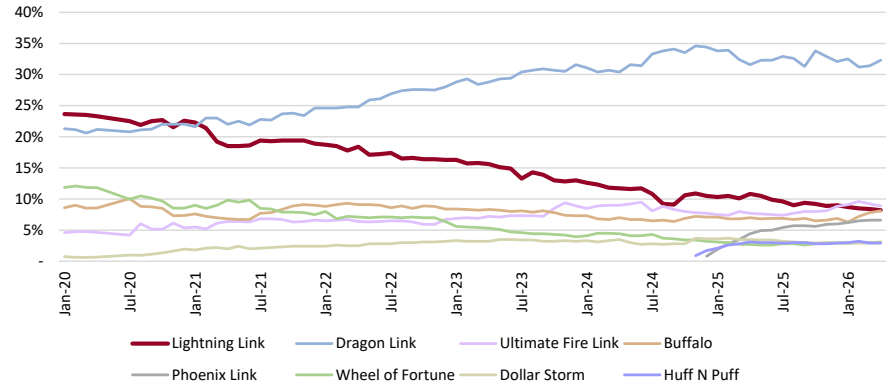

Although we currently think that it is unlikely that Lightning Link 10 Year Storm becomes a top-5 game, we do believe it could play a strong role in sustaining the floor share of the overall franchise.

The chart below shows the top premium lease franchises this decade based on their share of net win. We would group them into two buckets:

- Franchises whose base game is still the primary game.
  - Dragon Link - clear outlier within the industry.
  - Phoenix Link - top new game.
  - Lightning Link - franchise on the decline.
- Franchises that have been sustained with extensions.
  - Ultimate Fire Link, Buffalo, Wheel of Fortune, Dollar Storm & Huff n Puff.

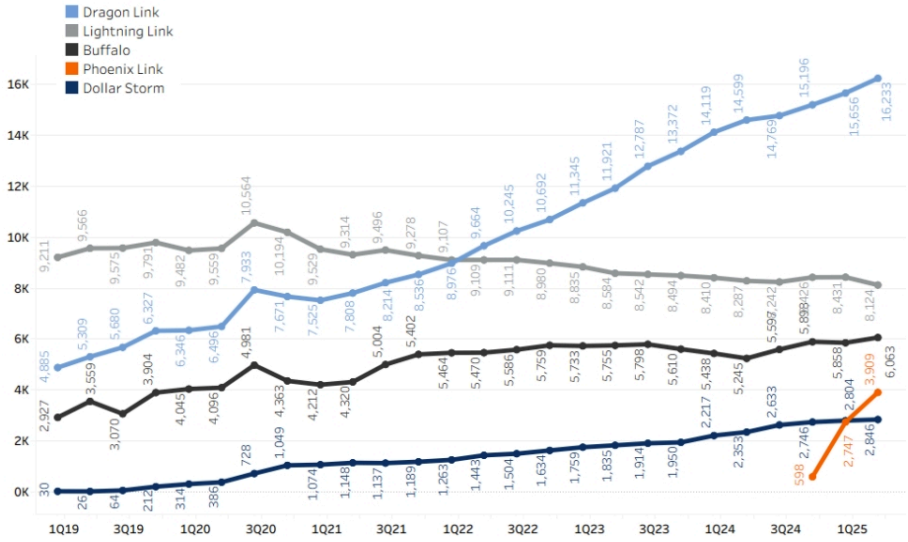

We believe Lightning Link will remain a top-5 franchise by simply moving into the second bucket. It is worth remembering that Lightning Link has now been on casino floors for over a decade. This is remarkable durability given the industry's evolution over that period.

Exhibit 10 - Top Premium Lease & WAP Franchises based on Net Win

Exhibit 11 - Eilers Estimated Install Base - Top 5 Aristocrat Premium Lease Franchises

Source: Eilers & Krejcik

Spooky Link Grand

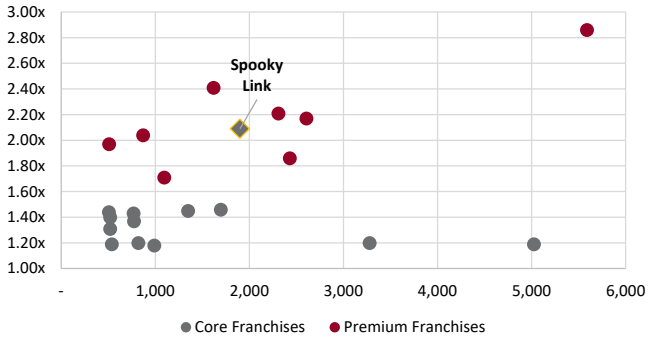

Last year we made the early call that Spooky Link was flying under the radar and could potentially be a top-5 caliber franchise (see Spooky Spins & Big Wins). Simply put, the franchise was performing far too well and the argument could be made that Aristocrat made a mistake by not releasing it as a premium lease game, rather than a core outright-sale game.

Exhibit 12 - Top Indexing Overall Parent Games

Rank	Game	Supplier	Slots	TvZ	Category
1	Dragon Link	Aristocrat	5,599	2.85x	Premium
2	Phoenix Link	Aristocrat	1,619	2.41x	Premium

Source: Eilers & Krejcik, E&P Estimates. Notes: Eilers minimum is 284 slots in the survey.

Exhibit 13 - Top Franchises by Unit Count (x-axis) & Theo Win vs. Zone (y-axis)

Source: Eilers & Krejcik, E&P Estimates. Note: Includes franchises with a unit count of >500 units on the latest Eilers report.

Subsequently, Aristocrat debuted Spooky Link Grand at G2E as a premium lease extension.

- The sequel will be available as a WAP game on the King Max cabinet and offers players an immediate chance at a $50k jackpot.

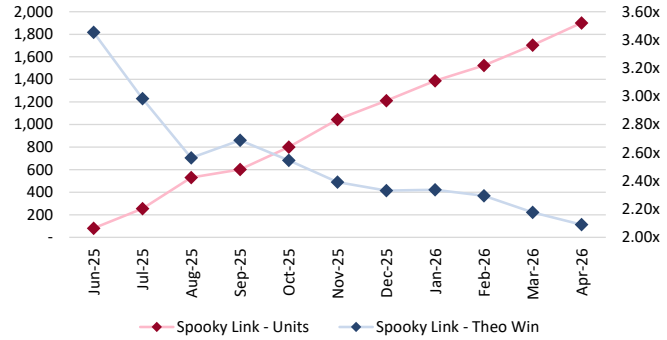

Thus far, Spooky Link Grand has generated a theo win vs. zone of 2.75x per unit.

- However, this is from a very small sample size, and we believe it's a little too early to make a call on how it could scale.
- The other thing to consider is that the game has a different benchmark relative to the other premium lease products.
  - Most casino operators that we have spoken to have said that they want premium lease games to perform at >2.0x house average. Anything below 1.5x is typically a hard cutoff and will be replaced.
  - However, Spooky Link Grand's benchmark is also impacted by its base game, which itself is still performing at 2.10x zone or 2.39x vs house average.

Our industry feedback has been a mixed interest in leasing the new premium game.

- Some casinos have indicated they will immediately install the game when available. Others are doubtful their will be enough of an uplift in performance to justify getting the game, particularly given the limits on the number of lease games they can have on their floor.
- The other feedback we have received is that the King Max cabinet is more difficult to place than the Baron cabinet given its size.

Exhibit 14 - Spooky Link (Core Franchise) - Units (LHS) & Theo Win (RHS)

Source: Eilers & Krejcik, E&P Estimates. Note: Unit count figures should be used only as a guide as the survey does not represent entire population.

Bao Zhu Zhao Fu Firecracker Express

As we mentioned before, Bao Zhu Zhao Fu Firecracker Express was not on our radar and has been overshadowed by the other big three games that have recently been released. However, its initial performance has been very strong and thus far superior to Lightning Link 10 Year Storm (albeit from a small sample).

We think it's worth highlighting that Monopoly, Spooky Link & the Bao Zhu Zhao Fu franchise have all been developed by Aristocrat's Gimmie Games studio, led by Dan Marks.

- Historically, Gimmie Games developed the majority of their games for the core outright sales market.
- The studio has recently moved into the premium lease category as well given the uplift in their games' performance, which has been driven by the development of new bonus mechanics.
- We view this as a favourable development for Aristocrat given their premium lease footprint is currently heavily concentrated in games from Scott Olive's High Roller Gaming studio, whose games include Dragon Link, Lightning Link, Phoenix Link & Dollar Storm.

Exhibit 15 - Bao Zhu Zhao Fu Franchise List

Game Ranking	Game Name	Days on Floor	Slots in Survey	Theo Win vs. Zone
9	Bao Zhu Zhao Fu Firecracker Express - Red Empire	19	32	2.69x
10	Bao Zhu Zhao Fu Firecracker Express - Purple Empire	19	35	2.65x
217	Bao Zhu Zhao Fu Ignite - Purple Prosperity	54	81	1.42x
191	Bao Zhu Zhao Fu Ignite - Jade Prosperity	56	91	1.47x
143	Bao Zhu Zhao Fu Ignite - Blue Prosperity	241	482	1.61x
130	Bao Zhu Zhao Fu Ignite - Red Prosperity	242	502	1.67x
383	Bao Zhu Zhao Fu Blast - Red Treasures	371	281	1.17x

523	Bao Zhu Zhao Fu - Red Festival	823	1,287	1.05x

Source: Eilers & Krejcik, E&P Estimates

Light & Wonder Games

LNW currently has fewer highly anticipated games that have recently been released. The franchise we see the most potential in, based on the early data points, is Lock N More Link. The series, available as a core product, was first displayed at the Australian Gaming Expo in August last year.

Exhibit 16 - Lock N More Link - Cats Hats N More Bats

Source: Light & Wonder

Exhibit 17 - Lock N More Link - Cats Hats N More Bats

Source: Light & Wonder

Noteworthy Franchises

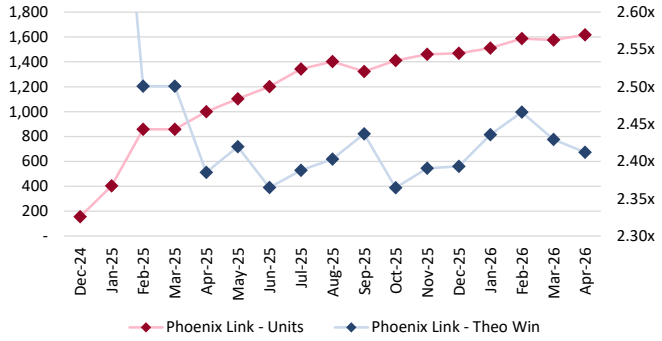

Below we examine the key franchises and relevant data points.

Phoenix Link

We are highly impressed with the robust performance of Phoenix Link.

- Theo win vs. zone has hovered around 2.40x for the past twelve months despite an increase in unit count.
- We view this as a positive read through for Lightning Link 10 Year Storm given that the game is from the same studio and features similar maths & bonus mechanics.

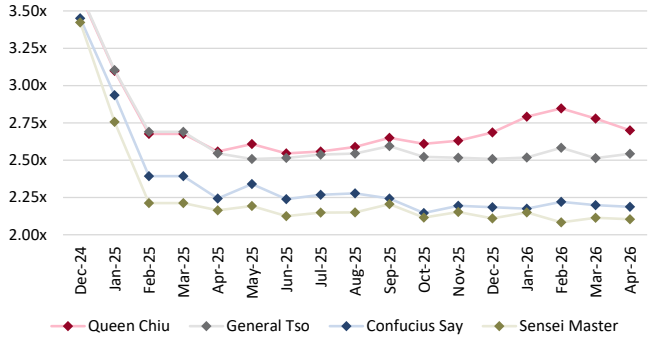

Exhibit 18 - Phoenix Link - Units (LHS) & Theo Win (RHS)

Source: Eilers & Krejcik, E&P Estimates. Note: Unit count figures should be used only as a guide as the survey does not represent entire population.

One interesting trend is a material gap between the different Phoenix Link themes.. We suspect the Queen Chiu theme in particular has developed a strong cohort of regular players, particularly among female and/or Asian demographics.

Exhibit 19 - Phoenix Link Theo Win by Theme

Source: Eilers & Krejcik, E&P Estimates

Exhibit 20 - Phoenix Link - Queen Chiu

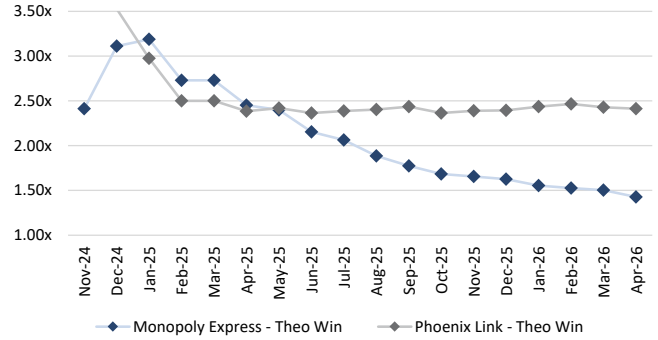

Source: Aristocrat

Monopoly (LNW)

LNW's Monopoly is a game that was released around the same time as Phoenix Link, but has not shown the same performance durability.

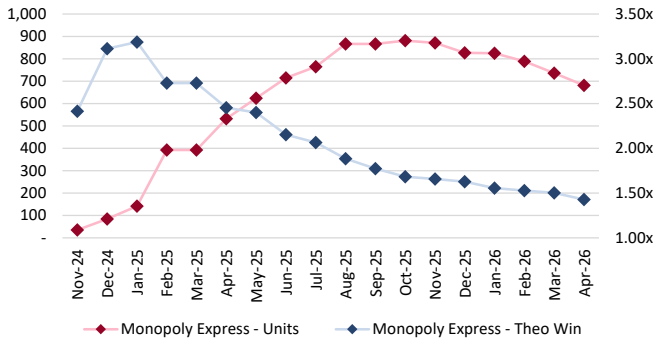

- Below we show the game's decline in theo win which has subsequently translated into a declining install base since the end of CY25.
- In the scheme of things, this doesn't have too much impact on LNW due to the conclusion of their licence with Hasbro.
  - Thus, LNW's leased Monopoly games needed to come off the floor by the end of CY26 anyway.
  - However, we had previously assumed that the majority of this churn would come in the back half of CY26 and we have therefore adjusted our forecasts accordingly

Exhibit 21 - Monopoly Express vs Phoenix Link - Theo Win

Source: Eilers & Krejcik, E&P Estimates

Exhibit 22 - Monopoly Express - Units (LHS) & Theo Win (RHS)

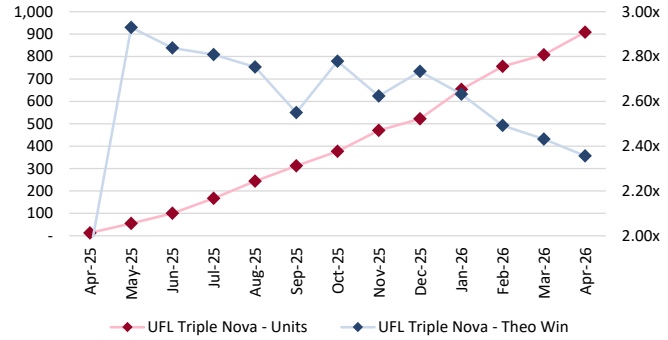

Source: Eilers & Krejcik, E&P Estimates. Note: Unit count figures should be used only as a guide as the survey does not represent entire population.

Ultimate Fire Link

Ultimate Fire Link (UFL) is LNW's strongest-performing franchise. We previously highlighted that their new extension UFL Triple Nova has reinvigorated the franchise into growth mode (see Ultimate Fire Slot Preview).

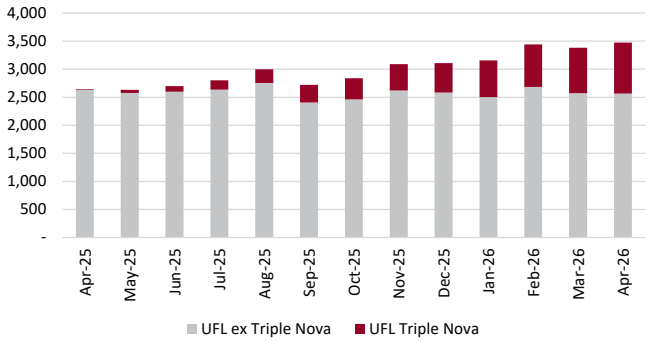

- In 1Q26, UFL Triple Nova appears to have continued to add units.
- Over the last year, we estimate that ~2,250 units have been added to casino floors.
  - The majority of these appear to be incremental to the franchise.

Exhibit 23 - Ultimate Fire Link Triple Nova - Units (LHS) & Theo Win (RHS)

Source: Eilers & Krejcik, E&P Estimates. Note: Unit count figures should be used only as a guide as the survey does not represent entire population.

Exhibit 24 - Ultimate Fire Link Franchise - Units

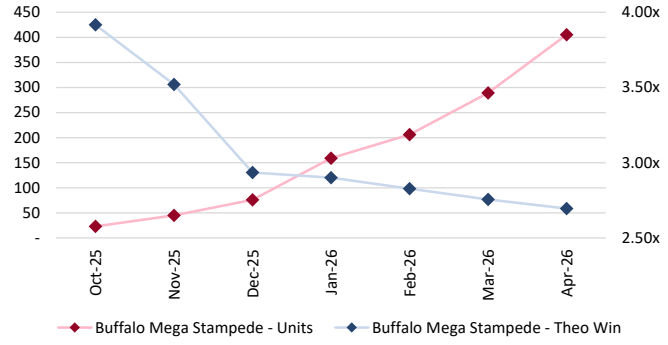

Source: Eilers & Krejcik, E&P Estimates. Note: Unit count figures should be used only as a guide as the survey does not represent entire population.

Buffalo

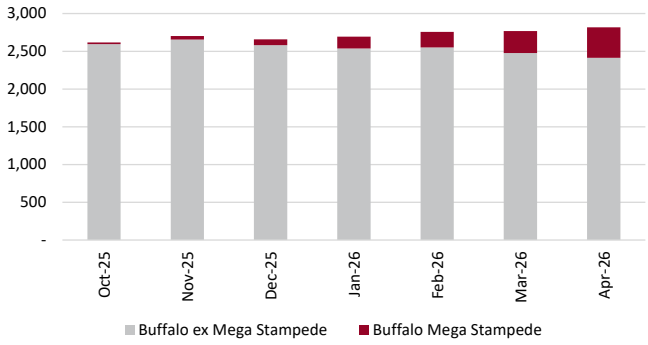

Buffalo also featured in our latest quarterly preview as a franchise with a strong new extension game: Buffalo Mega Stampede. However, relative to UFL, the new game additions appear to have been ~50% replacements of legacy Buffalo games and ~50% accretive units.

Exhibit 25 - Buffalo Mega Stampede - Units (LHS) & Theo Win (RHS)

Source: Eilers & Krejcik, E&P Estimates. Note: Unit count figures should be used only as a guide as the survey does not represent entire population.

Exhibit 26 - Buffalo Franchise - Units

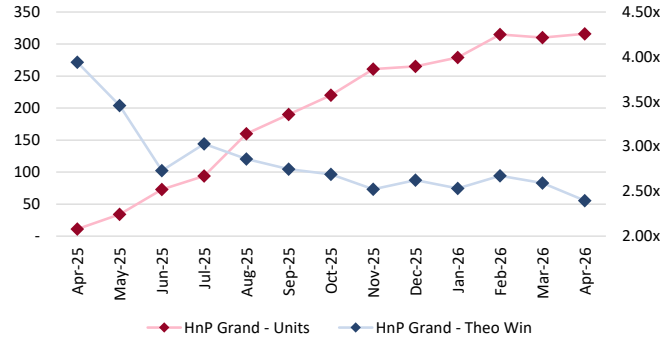

Source: Eilers & Krejcik, E&P Estimates. Note: Unit count figures should be used only as a guide as the survey does not represent entire population.

Huff n Puff

Prior to the Spooky Link & Bao Zhu Zhao Fu franchises, LNW's Huff n Puff was the most recent example of a strong-performing core franchise that migrated into the premium lease category. Since then, several themes have been added to the family, with Huff n Even More Puff Grand the strongest recent addition.

Exhibit 27 - Huff N Even More Puff Grand - Units (LHS) & Theo Win (RHS)

Source: Eilers & Krejcik, E&P Estimates. Note: Unit count figures should be used only as a guide as the survey does not represent entire population.

Exhibit 28 - Huff N Even More Puff Grand

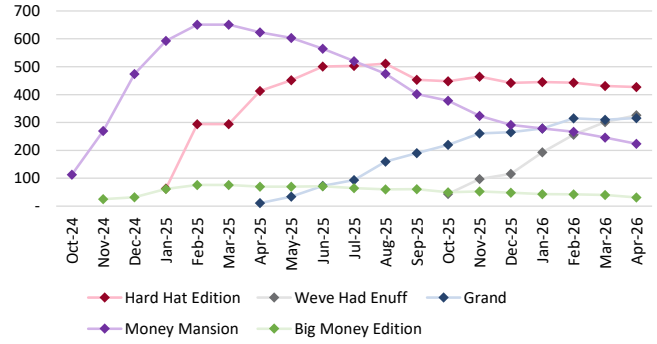

Source: Light & Wonder

However, we suspect that Huff n Even More Puff Grand additions will be almost all replacements of the existing franchise.

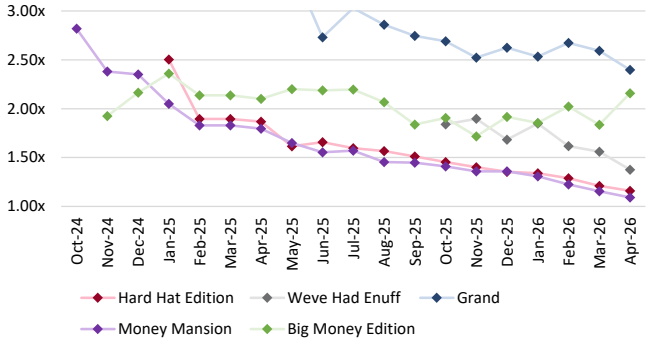

- This is because both the Hard Hat Edition, Money Mansion and Weve Had Enuff games all have significant unit volumes but declining performance.

Exhibit 29 - Huff n Puff Units by Theme

Source: Eilers & Krejcik, E&P Estimates. Note: Unit count figures should be used only as a guide as the survey does not represent entire population.

Exhibit 30 - Huff n Puff Units Theo Win by Theme

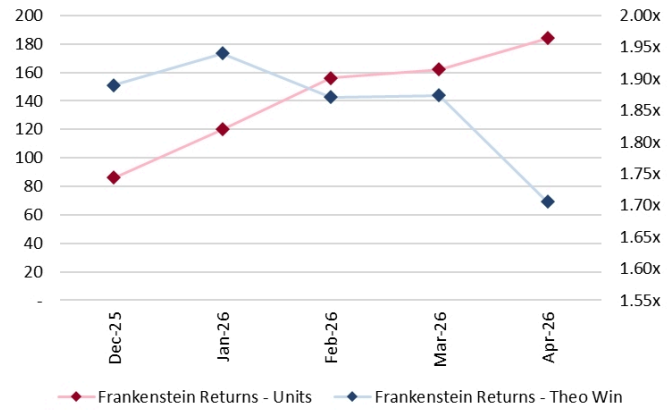

Source: Eilers & Krejcik, E&P Estimates

Frankenstein / Lightwave

The Lightwave cabinet was the most anticipated content for LNW from our post G2E feedback (see Dr. Frankenstein's Boardwalk). In our subsequent research note (see here), we concluded that it was unlikely that the initial launch game Frankenstein Returns would be a long-term success.

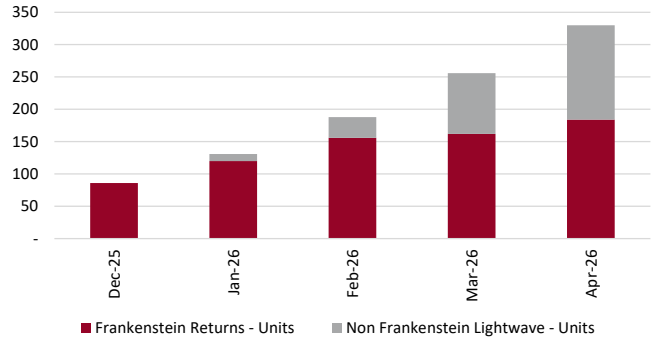

- However, we still believed that the cabinet would be incremental to LNW as most casinos prefer converting to a higher-performing game on the same cabinet, rather than switching cabinets entirely.
- Initially, Lightwave was set to launch with five new titles: Frankenstein Returns, Jackpot Party VIP Disco, Dancing Drums Revolution, Ultimate Fire Link Cash Falls Explosion, and Visitors from the Planet Moolah.
  - All except the UFL extension featured in the latest Eilers report. Of these, Dancing Drums is the strongest performer so far and the likely substitute option.

Exhibit 31 - Frankenstein Returns - Units (LHS) & Theo Win (RHS)

Source: Eilers & Krejcik, E&P Estimates. Note: Unit count figures should be used only as a guide as the survey does not represent entire population.

Exhibit 32 - Lightwave Cabinet - Units

Source: Eilers & Krejcik, E&P Estimates. Note: Unit count figures should be used only as a guide as the survey does not represent entire population.

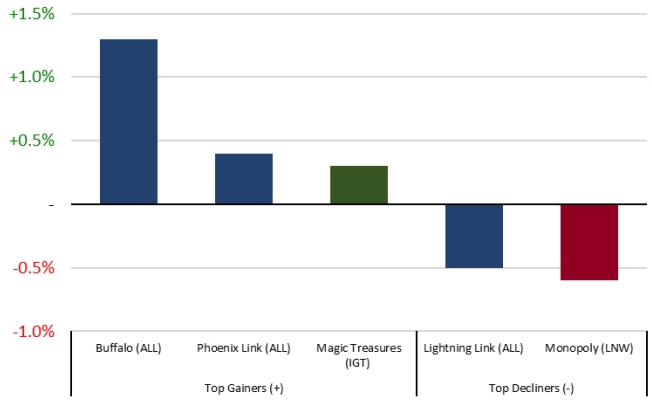

Market Share Movements

Below, we show the premium lease franchises with the largest net changes in premium lease market share. The majority of these we have discussed above.

- Interestingly, there were no new additions over the past quarter (i.e. the top 25 contains the exact same franchises).
  - This is partly due to a greater emphasis on extending existing successful franchises and partly a matter of timing.
- Buffalo was the most incremental franchise in the quarter due to the Buffalo Mega Stampede extension.
- Phoenix Link was the most incremental franchise over the full year and still appears to be gaining share.
- Lightning Link has ceded the most share over the last year by a wide margin.
  - This was also the case in most of our previous reports.

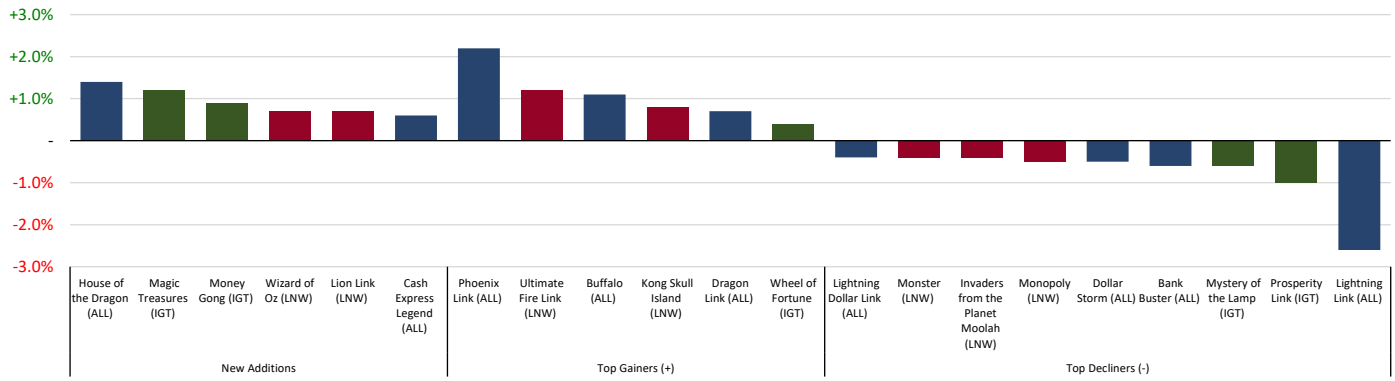

We acknowledge there may be some sample bias. However, the market share changes largely align with our industry feedback.

Exhibit 33 - 3 Month Net Change in % of Theo Win - Top Grossing Premium Lease & WAP Parent Games

Casino Capex Cycle & Key Events

Outright Sales Demand

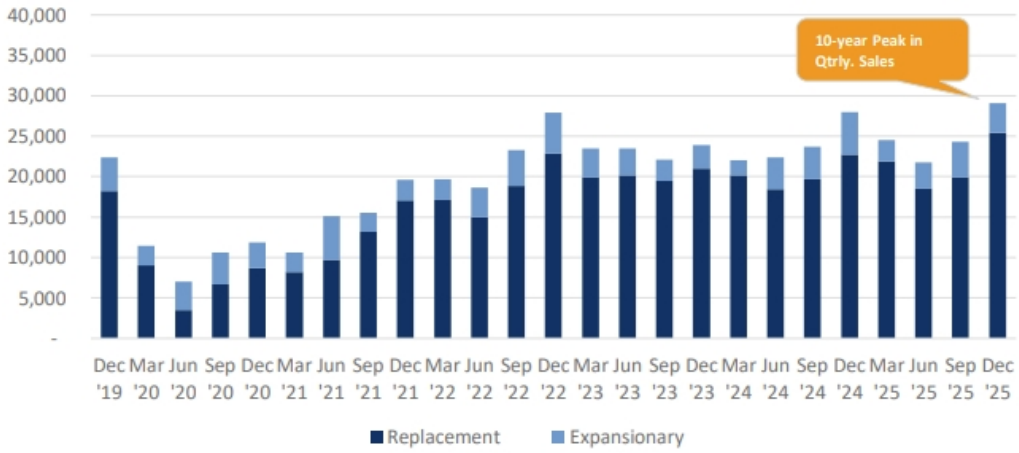

North American outright sales have been robust post covid.

- There were previously concerns about a weak CY25 due to a combination of tariff-related disruption, Canadian embargoes & stagnant macro growth.
- All of these have now eased to varying degrees and CY25 sales increased +4.0% yoy.
  - This is the strongest year since CY12/CY13.
- 4Q25 sales in particular hit a 10-year peak.

Although we are optimistic about the casino capex cycle, we expect a drop in unit sales for 1Q26.

- This is because 4Q25 sales were partly aided by one-off bulk orders from government-run jurisdictions.
- We also believe there was pent-up demand from earlier in CY25 and potentially some pull-forward from CY26 as well.

Exhibit 35 - Total Quarterly North America Slot Shipments

Source: Eilers & Krejcik

There are also three unique events that we believe are material and worth highlighting.

- The first two are the conversion of the Resorts World NYC casino & the licensing of Chicago VGTs.
  - Both of these we flagged in our last report (see here).
  - However, they remain major drivers for Aristocrat & LNW. As such, we discuss the incremental news flow below.
- The third is the launch of e-Pull tabs in Indiana.

New York Leased Unit Conversion

In December, the New York State Gaming Commission voted to license three new commercial casinos. Two of these are for brand-new casinos that won't be completed until around 2030. However, the third licence is for a conversion from an existing gaming facility in Queens, which will later undergo a further expansion. The current facility held exclusively leased Video Lottery Terminals (VLT) units but is transitioning into a full Class III gaming facility with slots and table games at a more traditional owned/lease mix.

Based on our industry feedback, our understanding of the key impacts is as follows.

- Table games are now allowed.
  - Therefore, the facility's electronic unit count (including ETGs) will shrink from ~5.5k to ~4.0k.
- The facility will go from 100% lease to ~15% lease.
  - The prior VLT units charged a low fee per day, in the ~$25-$30 range.
- IGT & LNW were the incumbents in New York VLT and had the largest share of the floor space.
  - Aristocrat also had VLTs in the facility but their unit share was in the low teens.

Our understanding is that not all the market is aware that this change is taking place.

- Beyond this, we believe that a large portion of those that are aware of the changes had forecast the impact to be later in CY26.
- However, the casino opened earlier this week, and our industry feedback, in conjunction with various regulator data points indicates that a large amount of the conversion occurred in Q1.

There are two things at the upcoming results that we are unsure how will be reflected.

- Under the rules of New York gaming, Class III & VLT cannot operate on the same floor at the same time.
  - Thus, our understanding is that the casino floor will have periods of inactive machines.
- A large number of the newer cabinets can be converted with a software upgrade rather than replaced entirely.

In aggregate, we are forecasting the following from the casino conversion spread over the first two quarters of CY26:

- LNW
  - A net reduction in lease footprint of ~1,800 units, alongside a small uplift in fee per day.
  - ~750 outright sales units/conversions.
- Aristocrat
  - A net reduction in lease footprint of ~400 units, alongside a small uplift in fee per day.
  - ~900 outright sales units/conversions.
    - A greater skew to conversions than LNW due to a greater proportion of newer cabinets.

Source: Resorts World NYC

Chicago VGT's

Since 2009, VGTs (video gaming terminals) have rapidly expanded in Illinois to ~49.3k units today. However, the Act gave individual municipalities the right to opt out VGTs which Chicago had historically done. However, this appeared as if it could change when the 2026 budget was announced last December.

- Over the last six months, there has been a lot of political posturing over issues such as tax distributions, potential ward-level bans and opposition from the city's casino operators.
  - However, it seems more likely than not that VGTs will go live in Chicago.
- Eilers currently forecasts that at maturity Chicago could add ~12,500 units based on ~3,300 eligible venues.

The current timeline for VGT's to become operational appears to be in late Q3 or Q4 this year.

- The Illinois Gaming Board (IGB) began taking applications in late February and has an estimated turnaround for approval of 6–8 months.
- As at the latest Illinois Gaming Board Committee meeting, there were 226 applications from Chicago establishments.

Our industry feedback suggests that both Aristocrat & LNW would command ~40% market share each.

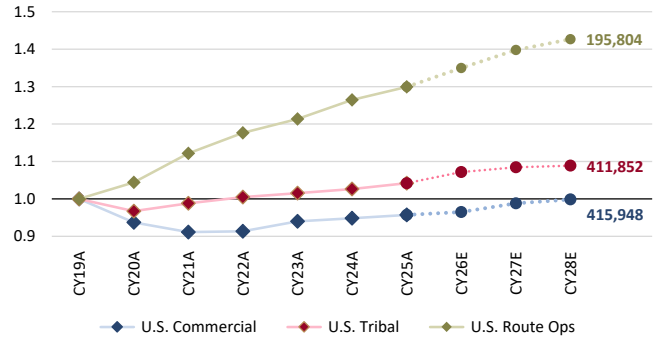

- Currently, Aristocrat only represents ~20% of the install base.
  - However, they only entered the market in 2020 and have had the best-performing games.
- As Aristocrat has scaled, LNW's footprint has slowly reduced to a little over 40% of the install base.
  - However, feedback indicates they currently have strong momentum with the Cosmic cabinet and are more willing than Aristocrat to port themes from their best Class III franchises into VGT.

We also want to highlight that the IGB recently awarded a new 10-year contract to LNW to operate the state's VGT systems.

- LNW is the incumbent supplier and earns a 0.92% monitoring fee on all GGR.
- This equates to ~US$29m in annual revenue.
  - The expansion of VGT's into Chicago has the potential to increase this by ~30-35%.

Illinois VGTs and other similar style units are classified as Route Ops (Route) by Eilers. Since, pre-covid, Route has been the fastest-growing market by a large margin compared to Commercial & Tribal. Furthermore, Eilers has revised up their Route install base forecasts following the expected launch of Chicago VGTs.

Indiana e-Pull Tabs

e-Pull Tabs went live in Indiana on the 30th of December and have scaled quickly.

- In late March, the Indiana Gaming Commission (IGC) disclosed that there were 2,562 units installed at the time and in early April an Indiana newspaper reported a total of 2,797 units.
- We believe this is a far quicker ramp-up than the market is currently expecting.
  - Eilers forecasts that a mature market could have ~4,200 to 6,300 units.

The IGC also stated that the primary distributors are Arrow, Grover and J&J Gaming.

- Our industry feedback indicates that Arrow has been particularly aggressive on pricing in order to maximise floor share.
  - As such, we expect them to have the largest install base, followed by Grover.
- Below we have shown a sensitivity table of the installations Grover would have based on their market share.

Relative to consensus, we believe there is upside at LNW's upcoming result.

- At their last result, management indicated that they expect +150-200 net adds as base point for existing states plus growth in new states.
- Current forecasts are for Grover to add ~+600 units total across all states, implying +400-450 units in Indiana.

Land-Based GGR Trends

US Data

March Slot GGR grew +1.5% yoy.

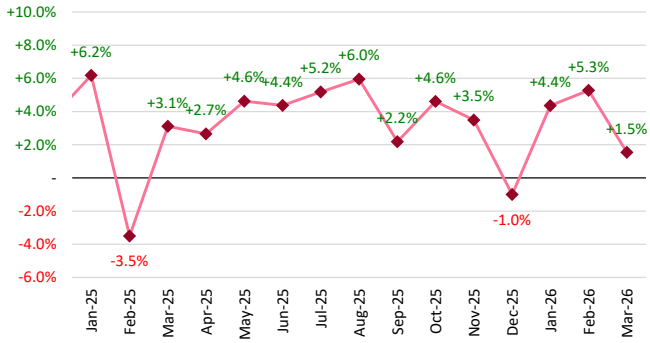

- This was actually a stronger number than we expected.
  - Nevada reported a strong number in the last few days and drove the bulk of the incremental growth.
  - Ex-Nevada, GGR only grew +0.1%.
- March 2026 also had a tough comp as March 2025 had an extra weekend.

Exhibit 42 - US Monthly Slot GGR (US$bn.)

Source: UNLV, various state gaming bodies, E&P Estimates

Exhibit 43 - US Slot GGR growth rate (YoY)

Source: UNLV, various state gaming bodies, E&P Estimates

We were a little concerned that March might see some softness from rising fuel costs.

- Many of the largest casinos in the USA outside of Las Vegas are located ~1hr drive from the nearest major metro area.
- Our industry feedback suggests that petrol prices are usually a factor in casino visitation & spend, particularly for mass-market players (non-VIPs).
  - However, the increase in petrol costs appears to have been offset by the favourable tax changes from the Big Beautiful Bill.

The majority of states actually saw a decline in GGR in March.

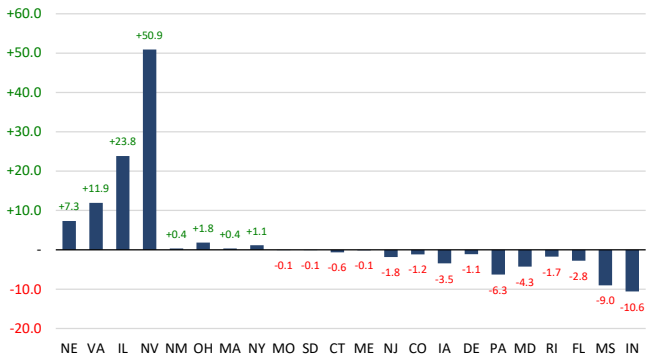

- Nevada grew +5.5%, delivering a record GGR month and driving the majority of incremental growth.
- The other three remaining growth state (Nebraska, Virginia & Illinois) all grew due to an expanding install base.

Exhibit 45 - March-26 US Slot GGR by State – YoY Growth (%)

Exhibit 46 - March-26 US Slot GGR by State – YoY Growth (US$m)

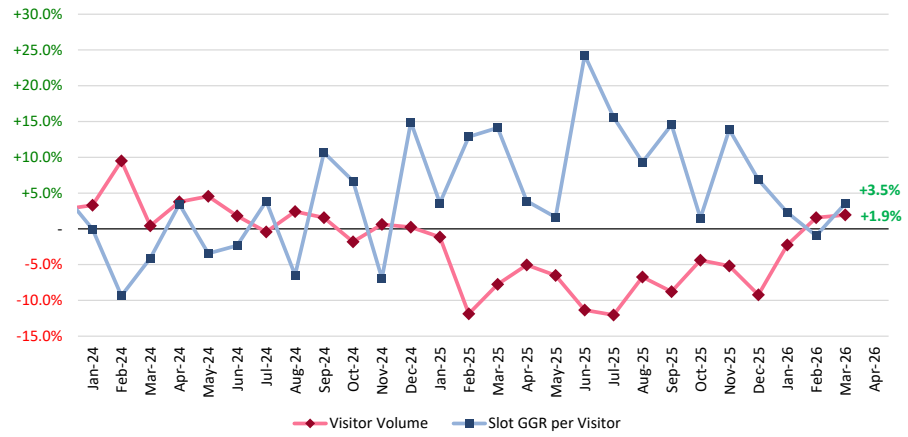

Source: UNLV, various state gaming bodies, E&P estimates.

Las Vegas saw a material shift in its customer base in 2025. Visitor volumes lagged whilst spend per visitor (particularly VIPs) remained strong.

- YoY trends appear to have normalised as the comps have now cycled through.
  - In February, visitation grew for the first time since Dec-24.
- March visitation grew +1.9% and spend per visitor was also up +3.5%

IRS Tax Reporting Threshold Changes

In our last quarterly report (see here), we discussed the potential impacts of the increase in the IRS reporting threshold from $1,200 to $2,000. Since then, we have sought industry feedback on he impacts on both consumer trends and slot purchase/leasing intentions.

Consumer Trends:

- ~60% of the jackpots that were above $1.2k fell within the $1.2k to $2.0k range (i.e. these machines no longer lock up).
- Mixed responses on the impacts to consumer spend. However, one casino noted that coin-in on their high-limit slots was +48%, while the rest of the floor was unaffected.
  - Theoretically this should benefit leased units and specifically Aristocrat the most.
- Much less paperwork is required, and consequently fewer casino staff are needed.

Impact on the Casino Floor:

- The change was a time-consuming task as each machine needed to be manually updated.
  - Casinos reported a range of 3-weeks to 3+ months to make the necessary changes.
- This had a mixed impact on slot vendor behaviour. We have heard the following responses:
  - No impact on purchasing or leasing decisions.
  - The change was foreseen, and as such, new product changes were brought forward into the December quarter last year.
  - The change was not foreseen, and new product changes have been delayed until the slot technicians complete the conversions.

In summary, we view the changes as a clear long-term positive, but a headwind for Aristocrat's and LNW's March quarter numbers.

Land-Based Read-Throughs

At the time of writing, the following casino read-throughs have reported their results. We summarise these below.

Boyd Gaming

- Regional trends continue to be much stronger than Las Vegas.
  - Regional Trends:
    - Continued strength in Core & Retail players.
    - Growth across all demographics and spend segments.
    - Trend among players to stay closer to home.
  - Las Vegas Trends:
    - Continued softness from destination/out-of-town customers (since 3Q25).
      - Reduced foot traffic.
      - Lower room rates as competitors become more aggressive.
    - Strong play from locals at non-Strip locations.
    - Comps are expected to become easier from 4Q26.
      - 2Q26 is expected to be down yoy.
      - 3Q26 is also expected to be down yoy but improving.
      - CY27 should see growth.
- Hard to measure the impact of rising gas prices when there is offsetting relief from stronger tax refunds.
- No noticeable changes in consumer behaviour across the three months.
  - January benefited from a favorable calendar vs. the pcp. March had the opposite.

Penn National Gaming

- Company-wide increase in both visitation & spend per visit.
  - Theoretical revenue growth across all player-worth segments was the largest quarterly increase in the past three years.
- April trends remain stable and in line with 1Q26.
  - Management is confident about the rest of CY26 despite geopolitical uncertainty.
- Not seeing any impact from rising gas prices yet.
  - Majority of their regional customers are within a 30-min drive.
  - Management believes employment is the strongest driving factor for GGR.
  - Tax refunds have reportedly been up +11-12% yoy and have definitely been a benefit.
- Seeing stronger retention amongst customers who have engaged with cashless gaming.

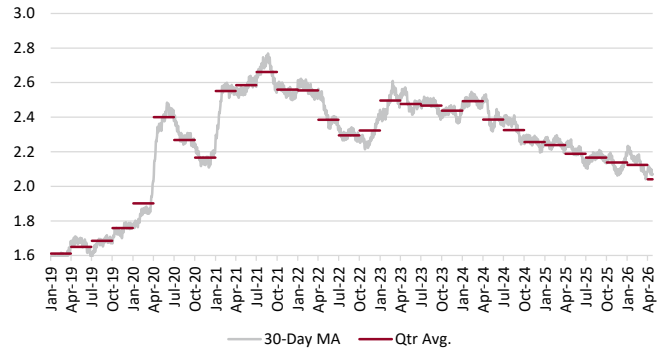

Churchill Downs

- Continued strength among higher-value rated players. Softness in lower-value unrated segments outside Kentucky.

Social Casino

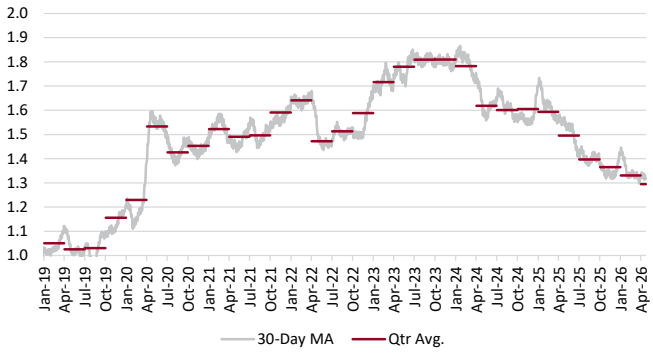

Since covid, app tracking of social casino revenue on the Apple and Google platforms as gradually become less representative given they exclude DTC platforms, which are gaining share. However, overall it appears that Aristocrat, and to a lesser extent SciPlay, continue to outperform the market.

iGaming

North America

Online Casino is still growing despite no new major states launching since Ontario in Apr-22.

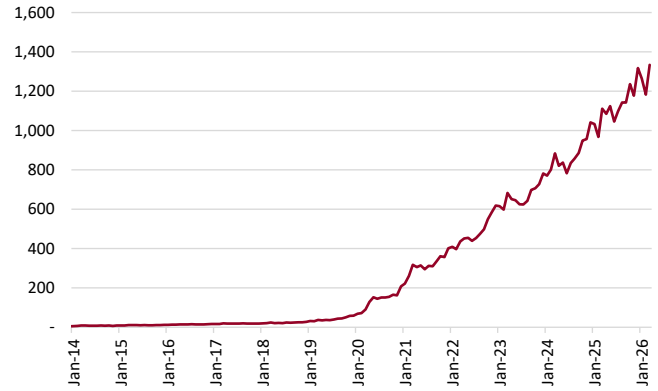

- However, growth has moderated to slightly below +30% over the past five months.

The biggest upcoming launch is Alberta which goes live on July 13.

- We estimate that this will add ~6% to the North American iGaming TAM.
- Canada also represents a more favourable operating market for suppliers due to the lower tax rates.

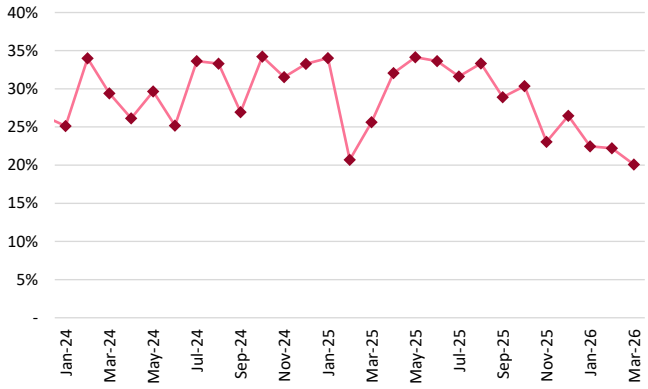

Outside of Alberta, there are a number of states/provinces that could legalise iGaming over the next few years such as Virginia, New York & Maryland. However, viewed individually, the probability of each state/province legalising appears low.

Exhibit 54 - North American Online Casino GGR (US$m)

Exhibit 55 - North American Online Casino GGR (US$m)

Source: Eilers & Krejcik, various state gaming bodies, E&P Estimates

Philippines

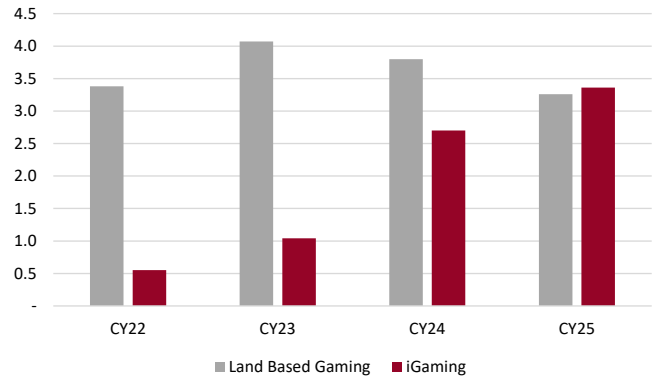

The Philippines is an emerging market that could be the most incremental to Aristocrat & LNW.

- Over the last three years, regulated iGaming GGR has grown sixfold and the market is now similar in scale to other major North American markets.
- The majority of this growth has come off the back of regulatory reforms aimed to channelize the black market.
  - The most recent estimates indicate that only 55% of online activity took place through regulated channels. As such, there still appears to be more room for regulated growth.
  - However, offsetting this in recent periods have been tighter restrictions on responsible gambling, particularly regarding e-wallets

We believe Aristocrat & LNW are well-placed to capture a meaningful share.

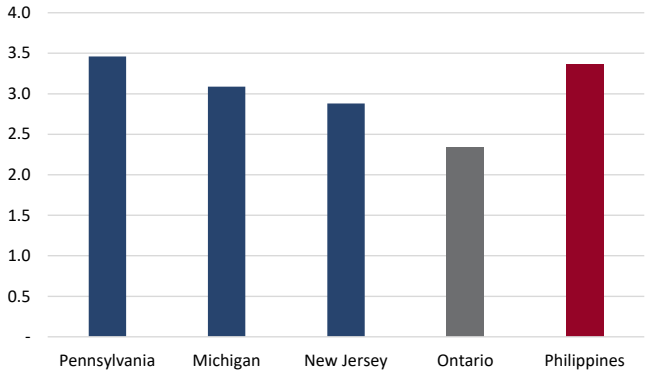

- Our industry feedback suggests both have a large share of the retail footprint (effectively a duopoly) and the regulator wants the online market to be run by land-based operators to ensure tax revenue is captured.
- In September last year, LNW was announced as the first accredited Philippines iGaming content supplier and aggregator. They also stated at their last result that they are exploring omni-channel relationships with land-based partners.

Changes to Forecasts

We have made the following changes to our overall forecasts.

Aristocrat

- A small decrease in Net Adds due to the NYC conversion.
- A decrease in ROW Outright sales for 1H26.
- Increased NA Outright sales starting from 1H27 due to the launch of Chicago VGTs.
- Slight increase in discount rate to reflect the increased risk of AI displacement.
  - This has mostly been reflected in the Social Casino business and to a lesser extent the iGaming business.

Our valuation declines to $62.56. We retain our Positive recommendation.

Light & Wonder

- A short-term decrease in LNW's lease footprint ex-Grover.
  - We have brought forward the impacts from the NYC conversion, which we previously forecast for later in CY26.
- A short-term increase to the Grover install base.
  - We have brought forward the benefits from Indiana due to the speed of the state's launch.
- A small increase in Fee Per Day to reflect the product mix above.
- Increased NA Outright sales starting from 4Q26 due to the launch of Chicago VGTs.
- Downgrades to 1Q26 International Outright Sales due to the timing of new cabinet launches in Australia.
- Small decrease in Social Casino revenue.
- Slight increase in discount rate to reflect the increased risk from AI (same as Aristocrat above).

Our valuation declines to $230. We retain our Positive recommendation.

Our Forecasts vs Consensus

Aristocrat

Overall, we are marginally ahead of consensus for Aristocrat's upcoming result. However, our biggest outlier is the North American net adds where we have a greater skew to 2H due to the cadence of game releases and the NYC conversion.

Light & Wonder

In aggregate, we are broadly in line with consensus for LNW's group headline numbers. However, we differ from consensus on some key line items. The most notable of these is the North American install base, where we are materially above consensus for Grover units and materially below for ex-Grover units.

RESEARCH RECOMMENDATION DEFINITIONS

Positive	Stock is expected to outperform the S&P/ASX 200 over the coming 24 months.
Neutral	Stock expected to perform in line with the S&P/ASX 200 over the coming 24 months.
Negative	Stock is expected to underperform the S&P/ASX 200 over the coming 24 months.
Speculative Buy	Stock has limited history from which to derive a fundamental investment view or its prospects are highly dependent on event risk, e.g. Successful exploration, scientific breakthrough, high commodity prices, regulatory change, etc. Consequently, the stock is considered a high-risk investment which may be prone to high volatility in share price movements, have a greater risk of capital loss and/or the stock may have low liquidity.
Suspended	Stock is temporarily suspended due to compliance with applicable regulatory and/or E&P policies in circumstances where E&P is acting in an advisory capacity.
Not Rated	Stock is not included in our investment research universe.

Research Criteria Definitions

Recommendations are primarily determined with reference to how a stock ranks relative to the S&P/ASX 200 on the following criteria:

Valuation	Composite of Rolling 12-month prospective multiples and discounted cash flow (DCF), or DCF for resource stocks.
Earnings Outlook	Forecast 2-year EPS growth.
Earnings Momentum	Percentage change in the current consensus EPS estimate for the stock (rolling 1-year forward basis) over the consensus EPS estimate for the stock 3 months ago.
Shareholder Returns	Composite of forecast ROE (rolling 1-year forward basis) and the percentage change in ROE over 2 years.
Debt Servicing Capacity	Rolling 12-month EBIT Interest Cover ratio.
Cyclical Risk	Qualitative assessment of the 2-year outlook for a stock/industry's profit cycle.
Industry Quality	Qualitative assessment of an industry's growth/returns potential and company specific management capability.
Financial Transparency	If we don't understand it, we won't recommend it.

For stocks where Evans and Partners does not generate its own forecasts, Bloomberg consensus data is used. Analysts can introduce other factors when determining their recommendation, with any material factors stated in the written research where appropriate.

GENERAL RESEARCH DISCLAIMER, WARNING & DISCLOSURES

In Australia, this document is provided by Evans and Partners Pty Ltd ABN 85 125 338 785, holder of AFSL 318075, trading as E&P Research (**Evans and Partners**).

In Hong Kong, this document is issued by E&P Asia (HK) Limited (company number: 2918464) (**E&P Asia**) which is licensed under the Securities and Futures Ordinance (Cap. 571 of the laws of Hong Kong) (**SFO**) for Types 1 and 4 regulated activities (CE number: BPX011).

Please refer to the document entitled 'Research Conflicts of Interest Disclosure' available for download from the Important Disclosures section of our website (www.eap.com.au) and Evans and Partners' Financial Services Guide (FSG) which is also available on our website.

The information is **general advice only** and does not take into consideration an investor's objectives, financial situation or needs. Before acting on the advice, investors should consider the appropriateness of the advice, having regard to the investor's objectives, financial situation and needs. If the advice relates to a financial product that is the subject of a Product Disclosure Statement (e.g. unlisted managed funds) or other disclosure document, investors should obtain the PDS or other disclosure document and consider it before making any decision about whether to acquire the product.

The material contained in this document is for information purposes only and does not constitute an offer, solicitation or recommendation with respect to the purchase or sale of securities. It should not be regarded by recipients as a substitute for the exercise of their own judgment. Investors should be aware that past performance is **not an infallible indicator** of **future** performance and future returns are not guaranteed.

Any opinions and/or recommendations expressed in this material are subject to change without notice and none of Evans and Partners, its related companies, associated entities, or any of their respective officers, employees, agents, advisers or contractors (**E&P Group**) are under any obligation to update or keep current the information contained herein. References made to third parties are based on information believed to be reliable but are not guaranteed as being accurate.

This document is provided to the recipient only and is not to be distributed to third parties without the prior consent of Evans and Partners, or E&P Asia (in the case of Hong Kong).
