Gaming

Big Board, Big Bucks

In this note we preview the upcoming results for Aristocrat and Light & Wonder (LNW), as well as provide an update on various industry movements and datasets.

Based on US Slot GGR data and casino readthroughs, the US macro has remained robust. Concerns that rising petrol prices would cause a decline in GGR have not materialised, as the impact appears to have been largely offset by stronger tax refunds from the Big Beautiful Bill and stock market strength. Industry feedback from casinos is that they continue to invest in their slot floors given the benefit they are seeing from top-performing games.

Aristocrat (Positive recommendation, $70.64/sh valuation)

Reporting in November

Aristocrat has the strongest cadence of new game releases we have seen in our time covering the company, led by Monopoly Big Board Bucks. Monopoly is the most significant new launch since Phoenix Link and, in our view, could become the next Top-5 franchise. We also expect a higher proportion of accretive (rather than conversion) units than is typical for a new release, given the unique cabinet and sign package, with industry feedback suggesting Aristocrat is offering incentives where the units are incremental to a casino's existing floor. On that basis, Aristocrat's FY26 North American net adds guidance of 4.0k to 5.0k looks conservative to us, and we sit marginally ahead of this range.

Over the next few months, the recent launches of Lightning Link in iGaming and the Massachusetts iLottery will be key initiatives to track. Both are market-leading in nature and will provide an important read on the path to Aristocrat's US$1bn 2029 Interactive target.

Light & Wonder (Positive recommendation, $181/sh valuation)

Wednesday 5th August (Link)

LNW has fewer standout new releases this quarter, which we read as a reflection of Aristocrat's unusually strong release cadence rather than any underperformance by LNW. Bride of Frankenstein is nonetheless LNW's best new game and has helped stabilise the Monsters franchise. The Lightwave Solar Cabinet, a for-sale version of LNW's top new premium lease cabinet, should drive incremental unit sales and ASP momentum in the back half of CY26.

Looking ahead to LNW's result next week, we are only marginally below consensus for LNW's 2Q26 headline numbers. Of the noteworthy KPI's, we are below on NA ex-Grover net adds due to the timing of game releases, and also below on International Outright Sales due to a lower-than-expected market share in Australia.

Top New Games

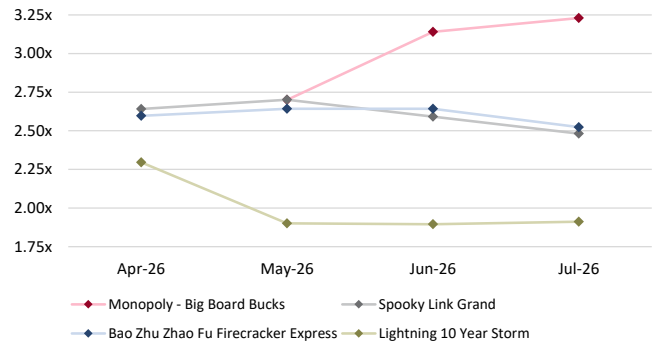

Aristocrat's Big Four Games

In our last quarterly preview (Pass Go, Collect Floor Share), we discussed how Aristocrat had arguably its strongest lineup of new content in years. In particular, we highlighted the following four games below. Each of these were very new to casino floors at the time, and they remain the top new Aristocrat games.

- Monopoly Big Board Bucks
- Lightning Link 10 Year Storm
- Spooky Link Grand
- Bao Zhu Zhao Fu Firecracker Express

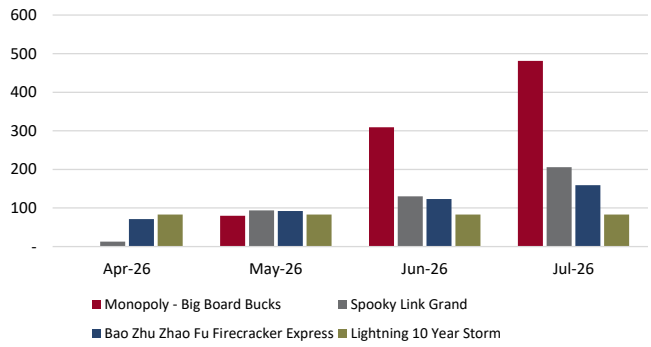

In particular, Monopoly was arguably the most hyped game release post COVID, rivalled only by NFL & Phoenix Link. It also looks to be the strongest of the four new games, both in performance and in how quickly the game has scaled.

Exhibit 1 - Aristocrat's Top New Games - Theo Win

Source: Eilers & Krejcik, E&P Estimates

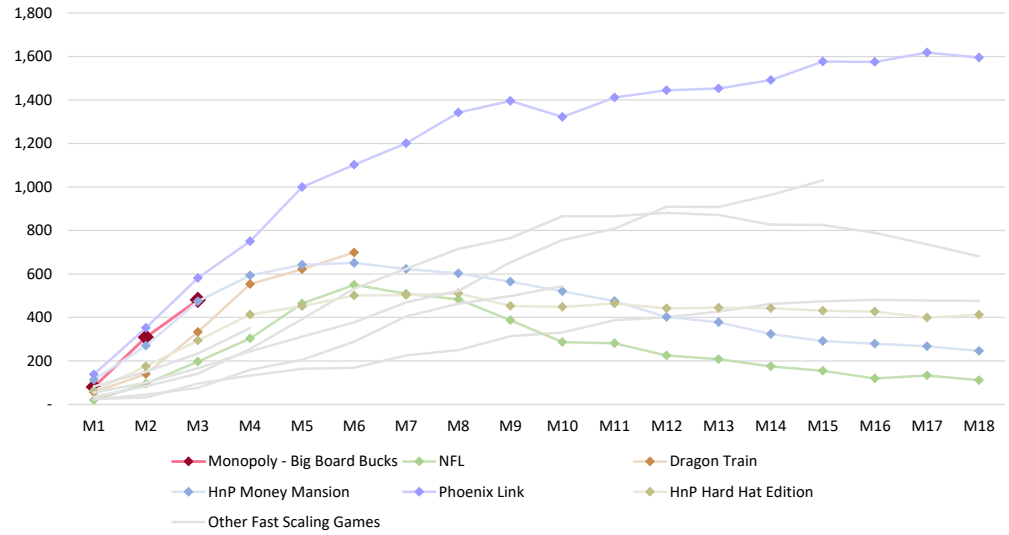

Exhibit 2 - Aristocrat's Top New Games - Units

Source: Eilers & Krejcik, E&P Estimates. Note: Unit count figures should be used only as a guide as the survey does not represent entire population.

Monopoly ranks among the fastest scaling premium lease franchises we have seen in recent history. This is even more impressive when considering that the rollout of the games has been partially restricted by hardware constraints (the game has a unique sign package). Our industry feedback is that the majority of casinos were limited to four units in their initial batch, with a ~4-month wait for a second batch. The upside of this is it does increase the probability that the new Monopoly units will be incremental to Aristocrat's lease footprint, rather than just a software conversion.

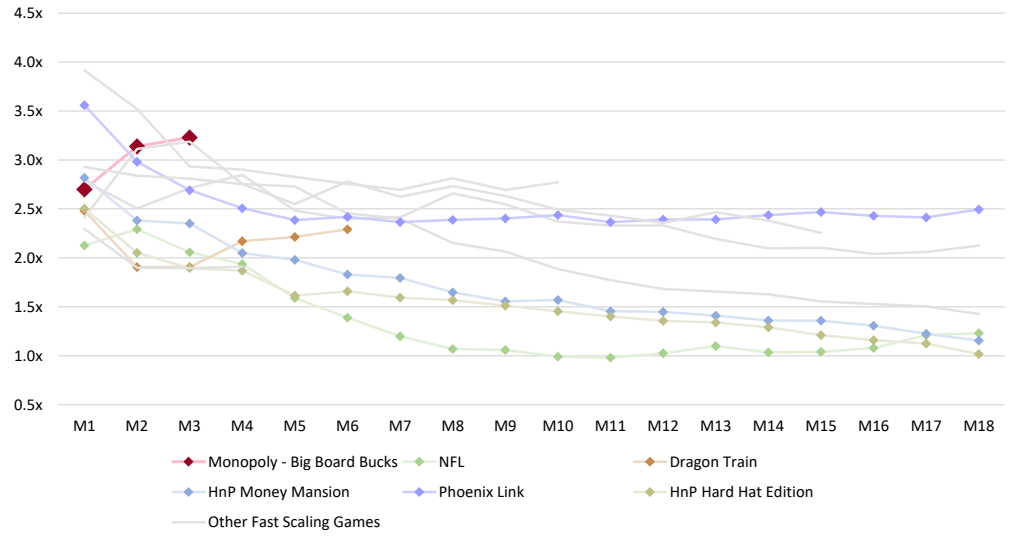

Exhibit 3 - Fastest Scaling Premium Lease Games - Units

Source: Eilers & Krejcik, E&P Estimates. Note: Unit count figures should be used only as a guide as the survey does not represent entire population.

Of these fast scaling franchises, Monopoly has also had one of the strongest performances. Interestingly this performance has improved in each of the three months it has featured on the Eilers reports. We suspect the restricted rollout of units is currently aiding this performance due to the game having less self-cannibalisation than other top games.

Exhibit 4 - Fastest Scaling Premium Lease Games - Theo Win

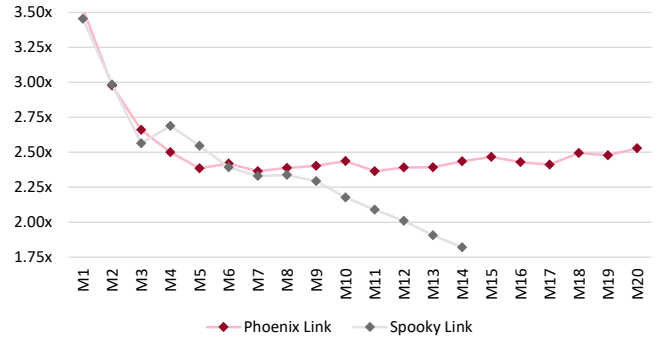

Source: Eilers & Krejcik, E&P Estimates. Note: Unit count figures should be used only as a guide as the survey does not represent entire population.

We remain somewhat cautious on whether Monopoly's performance will hold over the longer term. We say this because the fundamental Monopoly math is based on the Spooky Link game. Spooky Link has been the best core game we have seen for a long time and has

scaled incredibly fast. However, its performance has gradually declined and doesn't appear to have the same longevity as Aristocrat's other top franchise of the past few years, Phoenix Link.

Exhibit 5 - Phoenix Link & Spooky Link - Theo Win

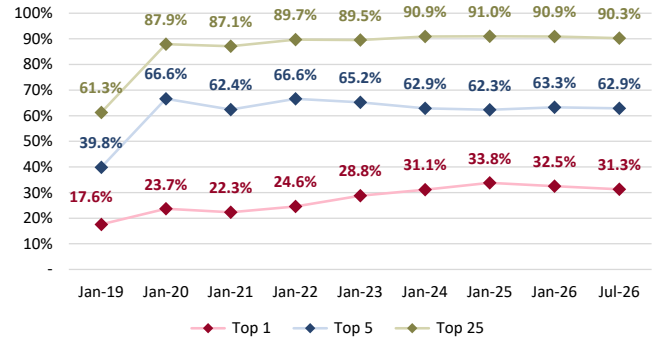

Source: Eilers & Krejcik, E&P Estimates

That said, given its initial performance, in conjunction with Monopoly's strong brand that has the potential for further spin-off games, we believe Monopoly is likely to become a Top-5 franchise.

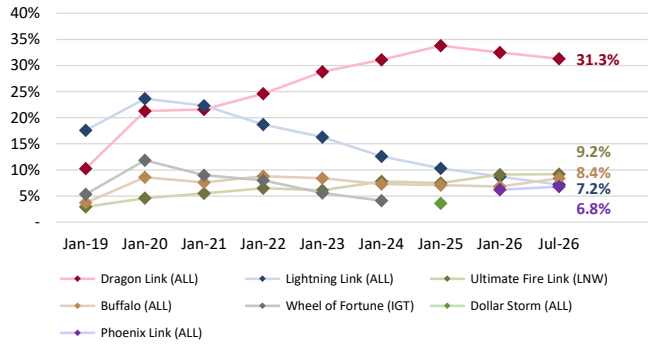

We have previously written about how the premium lease market share is becoming more concentrated among fewer franchises. In fact, from Jan-19 until Oct-24, the same five franchises were the top-grossing franchises. The latest franchise to crack the Top-5 was Phoenix Link. If Monopoly does break in, we would predict Lightning Link to be the franchise that it replaces.

Source: Eilers & Krejcik, E&P Estimates

Exhibit 7 - Top-5 Premium Lease & WAP Franchises based on Net Win

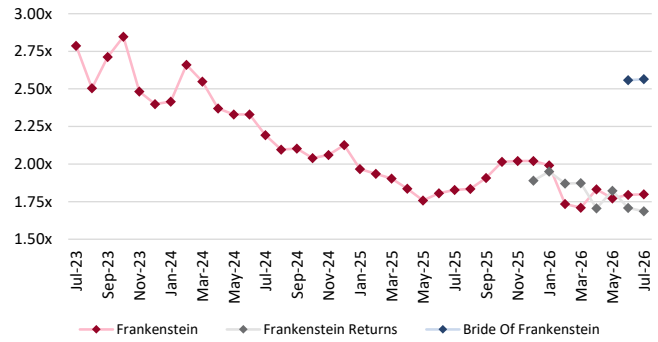

Source: Eilers & Krejcik, E&P Estimates

Bride of Frankenstein

Of the games released only in the past quarter, LNW's Bride of Frankenstein looks to be the strongest. The game is currently performing 2.56x vs zone, albeit from a small sample size. This is a promising result for LNW as original Frankenstein had been reducing in footprint and the recent Frankenstein Returns extension was a little underwhelming.

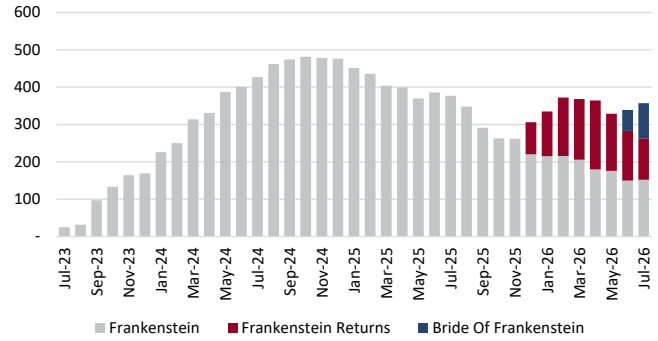

LNW also has a number of other games that look like they could be incremental to their portfolio, but are unlikely to be market leading games based on their initial performance. These include: Dancing Drums - Dragon, Dancing Drums - Revolution, Rampage Quick Hit - Ultra Link & Huff n Puff Link.

Source: Light & Wonder

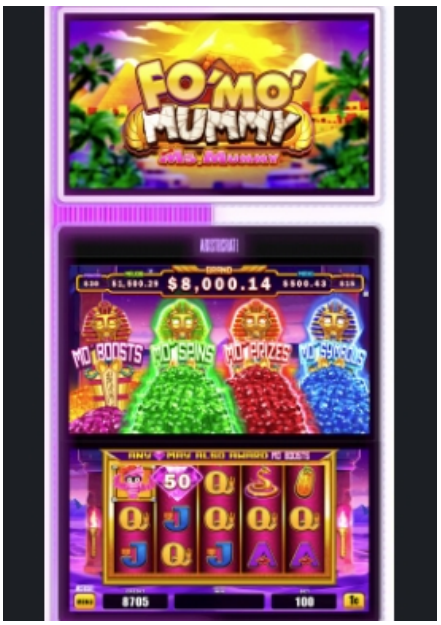

Games to Watch

The following are games/content with some potential that we expect to hit the Eilers charts in the coming months or had too small of a sample size in the latest report.

Aristocrat

- Fo Mo Mummy - an expansion on the original Mo Mummy core game.
- NFL Super Grand Champions - a more cartoon-style version of the NFL brand relative to the original launch titles.
- Safe Buster - combines elements of Bank Buster & Crazy Chickens. Bank Buster recently dropped out of the top-25 franchises, so the extension could help stabilise the franchise.

Exhibit 11 - Fo Mo Mummy

Exhibit 12 - NFL Super Grand Champions

Source: Aristocrat

Exhibit 13 - Safe Buster

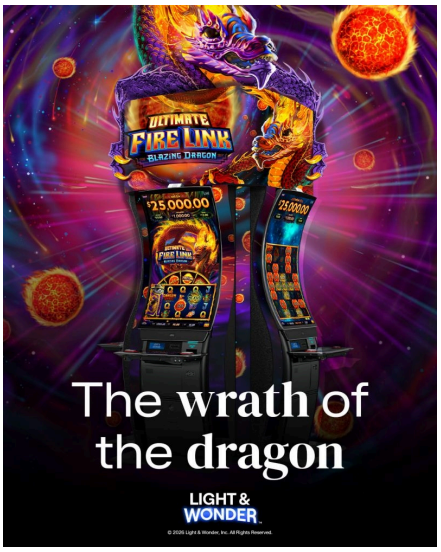

Source: Aristocrat

Light & Wonder

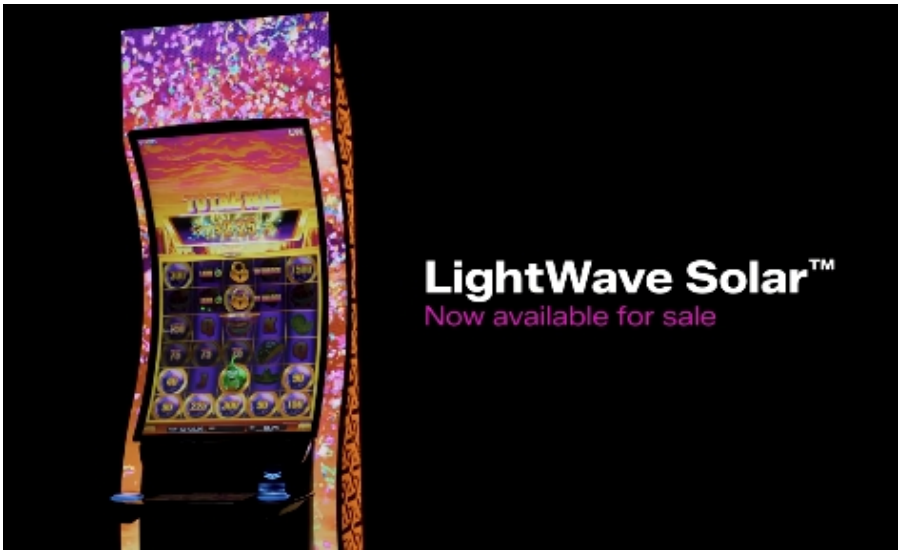

- Ultimate Fire Link Blazing Dragon - the latest extension to LNW's top franchise.
- Hot Trio Fiesta Caliente - the first game launched from Kelsey Foster's new studio (ex-IGT game designer).
- Lightwave Solar Cabinet - A for-sale version of LNW's top new premium lease Cabinet. We would expect this to drive incremental unit sales & ASP momentum in the back half of CY26.

Exhibit 14 - Ultimate Fire Link Blazing Dragon

Exhibit 15 - Hot Trio Fiesta Caliente on the Lightwave Solar Cabinet

Source: Light & Wonder

Noteworthy Franchises

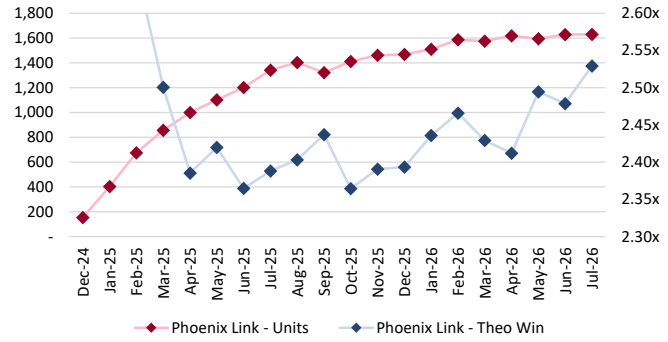

Below we examine some of the key franchises and recent performance.

Phoenix Link

Phoenix Link continues to impress us with its robust performance. Theo win in the latest July report was the strongest over the last 12-months. This is highly unusual as almost all games have a downward trend after launching.

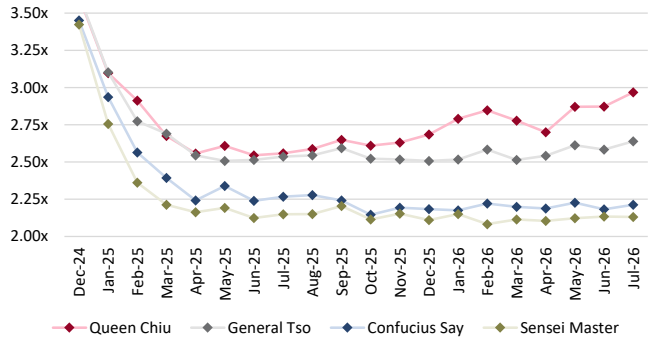

We also noted last time the material gap between the different Phoenix Link themes (see here). We suspect the Queen Chiu theme performs particularly well amongst female and/or Asian demographics.

Exhibit 16 - Phoenix Link - Units (LHS) & Theo Win (RHS)

Source: Eilers & Krejcik, E&P Estimates. Note: Unit count figures should be used only as a guide as the survey does not represent entire population.

Exhibit 17 - Phoenix Link Theo Win by Theme

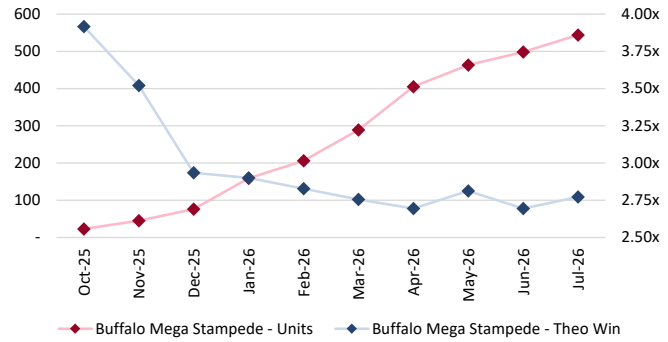

Source: Eilers & Krejcik, E&P Estimates

Buffalo

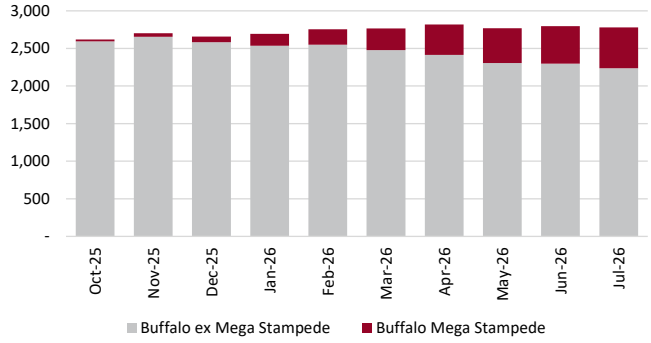

Buffalo Mega Stampede is another game that is also showing strong performance durability. The new extension game has driven the franchise back into growth mode, with units appearing to be ~50% replacements of legacy Buffalo games and ~50% accretive units.

Exhibit 18 - Buffalo Mega Stampede - Units (LHS) & Theo Win (RHS)

Source: Eilers & Krejcik, E&P Estimates. Note: Unit count figures should be used only as a guide as the survey does not represent entire population.

Exhibit 19 - Buffalo Franchise - Units

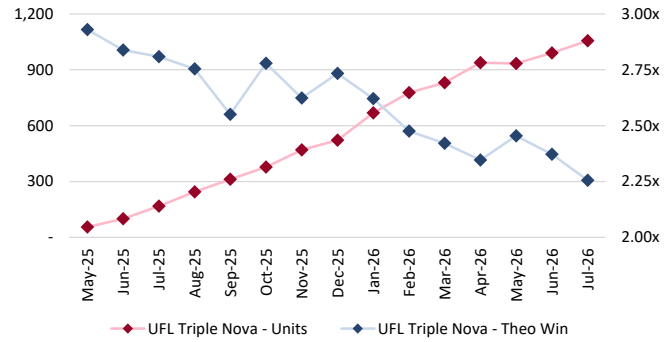

Source: Eilers & Krejcik, E&P Estimates. Note: Unit count figures should be used only as a guide as the survey does not represent entire population.

Ultimate Fire Link

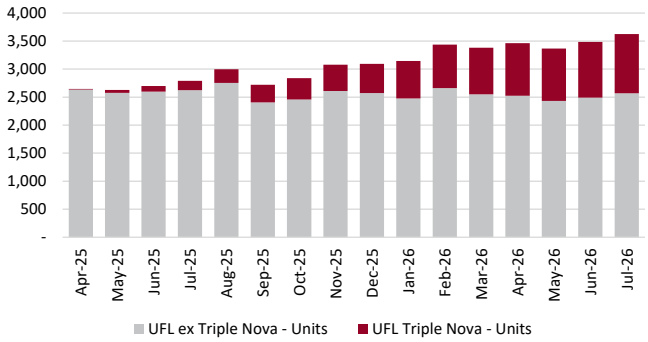

Ultimate Fire Link Triple Nova has been LNW's most accretive franchise over the past 12-months. However, its performance is gradually declining. That said, the game is still doing well, and the extension appears to be almost 100% accretive to the franchise install base.

Exhibit 20 - Ultimate Fire Link Triple Nova - Units (LHS) & Theo Win (RHS)

Source: Eilers & Krejcik, E&P Estimates. Note: Unit count figures should be used only as a guide as the survey does not represent entire population.

Exhibit 21 - Ultimate Fire Link Franchise - Units

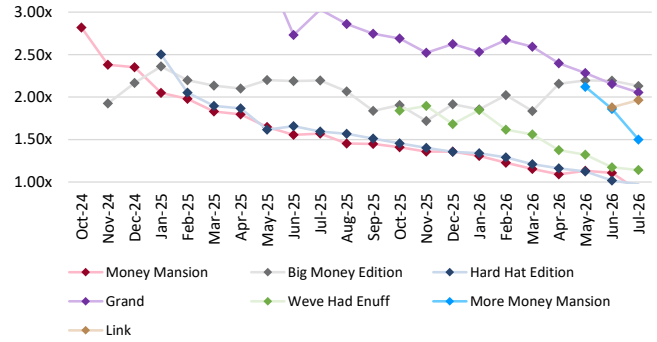

Source: Eilers & Krejcik, E&P Estimates. Note: Unit count figures should be used only as a guide as the survey does not represent entire population.

Huff n Puff

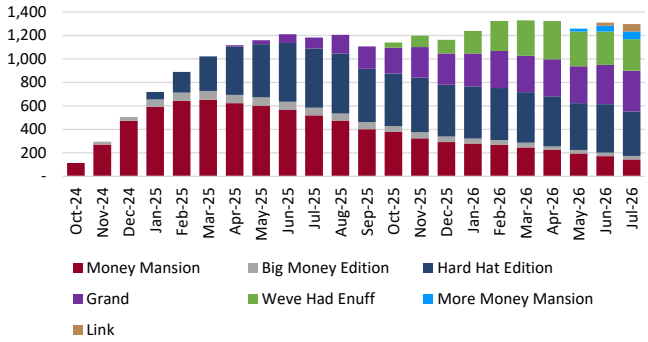

Huff n Puff remains LNW's 2nd top franchise. However, its games don't seem to have a particularly strong performance longevity and the new extension games appear to be primarily replacing existing games within the franchise.

Exhibit 22 - Huff n Puff Units Theo Win by Theme

Source: Eilers & Krejcik, E&P Estimates

Exhibit 23 - Huff n Puff Units by Theme

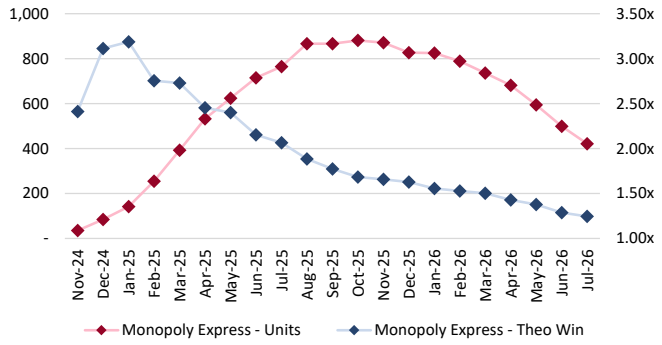

Source: Eilers & Krejcik, E&P Estimates. Note: Unit count figures should be used only as a guide as the survey does not represent entire population.

Monopoly (LNW)

LNW's Monopoly has had a declining install base due to the conclusion of LNW's licence with Hasbro which requires the games to come off the floor by the end of CY26.

The games' performance has also been declining over the past year, which we believe has sped up the conversions. In the scheme of things, this doesn't have much impact, but we did initially have a larger proportion of the conversions occurring in 2H26 that appear to have been brought forward.

Exhibit 24 - Monopoly Express - Units (LHS) & Theo Win (RHS)

Source: Eilers & Krejcik, E&P Estimates. Note: Unit count figures should be used only as a guide as the survey does not represent entire population.

Market Share Movements of Top Franchises

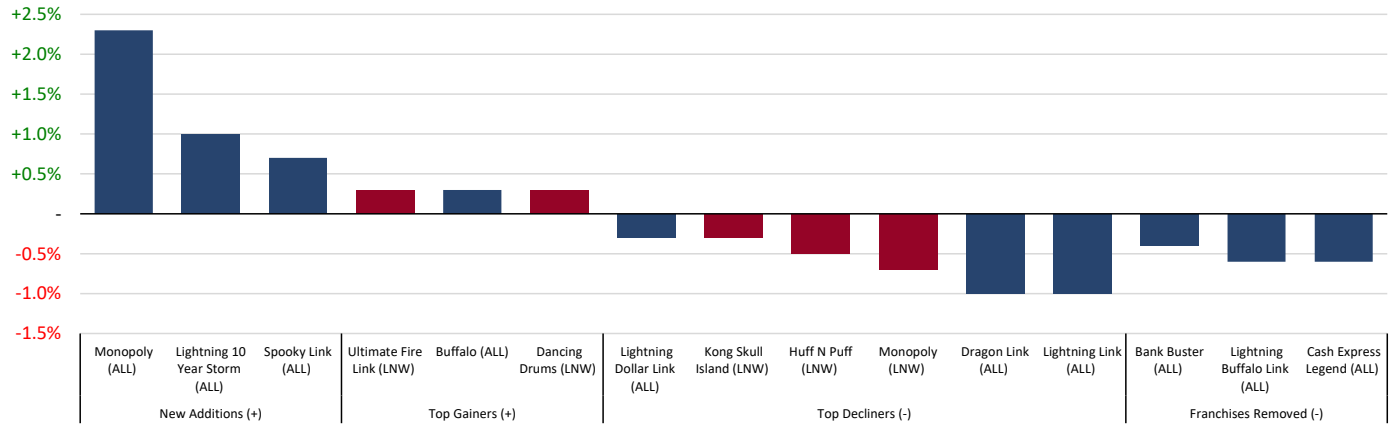

Below, we show the premium lease franchises with the largest net changes in premium lease market share.

- Aristocrat's Monopoly is clearly the fastest scaling new franchise since Phoenix Link.
- Lightning 10 Year Storm is the 2nd top new addition over the past three months.
  - However, the original game Lightning Link has consistently been one of the top decliners over the past 18 months.
- Ultimate Fire Link was the top gaining existing franchise over the past three months & twelve months.
  - The new Ultimate Fire Link – Blazing Dragon game could help sustain this momentum.

We acknowledge there may be some potential sample bias, particularly for the established franchises rather than the new additions. In particular, Dragon Link often has some variation due to its scale. However, the market share changes for the other franchises largely align with our industry feedback.

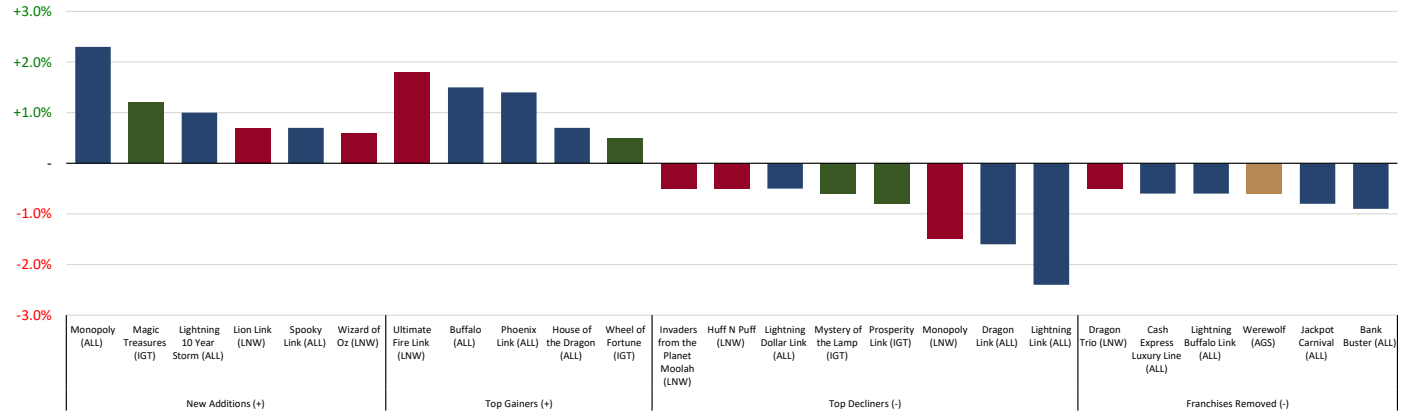

At the moment, we would say that Aristocrat has the strongest momentum, and we would expect this to continue for at least the next six months. Although Aristocrat has the most franchises with the biggest decline, this is more than offset by the performance of their top new franchises and is a testament to their strong R&D pipeline.

Land-Based GGR Trends

US Data

June Slot GGR grew +2.3% YoY.

- This is slightly down vs. April/May. Relative to 2025, we note the following for June.
  - We are unsure what impact the World Cup had on visitation and discretionary spend.
  - 2026 had one less weekend day.

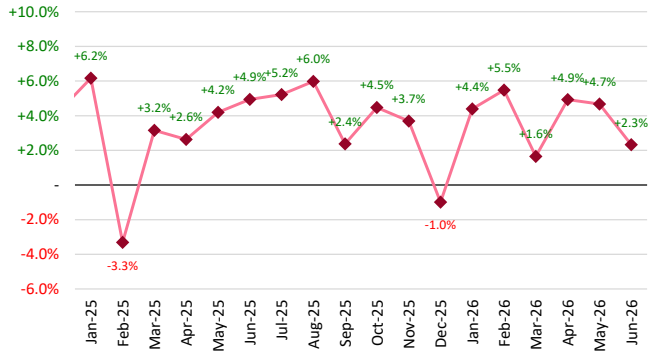

US GGR has generally been robust throughout the past-18 months. The other four softer months have usually had a non-consumer driven cause.

- Feb-25 was due to adverse weather and a leap-year comp.
- Sep-25 was impacted by the timing of Labour Day - i.e. the benefits of the weekend aided August at the expense of September.
- Dec-25 was impacted by bad weather in the US Northeast (Storm Devin).
- Mar-26 had a tough comp with one less weekend than the pcp.

Industry feedback and US read-throughs indicate that there are both positive and negative macro catalysts that have largely offset each other on aggregate.

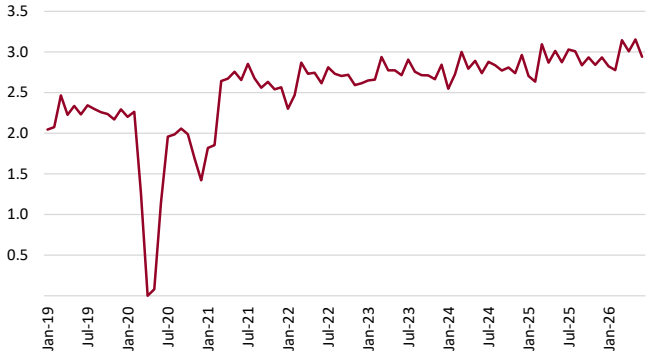

- Positive – Stronger tax refunds from the Big Beautiful Bill & stock market strength.
- Negative – Higher gas prices, higher airfares (mostly impacting Las Vegas), other inflationary pressures & geopolitical concerns.

Exhibit 27 - US Slot GGR growth rate (YoY)

Source: UNLV, various state gaming bodies, E&P Estimates

Exhibit 28 - US Monthly Slot GGR (US$bn.)

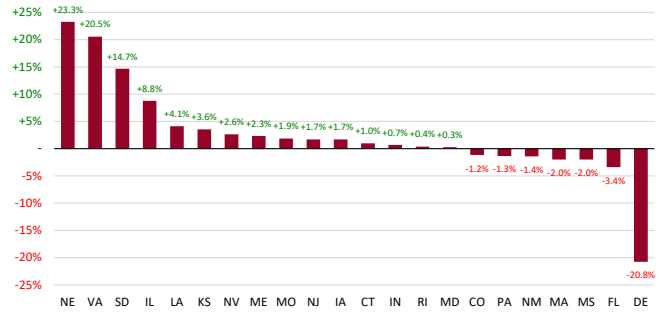

Source: UNLV, various state gaming bodies, E&P Estimates.

15/22 available states saw +'ve YoY growth in June.

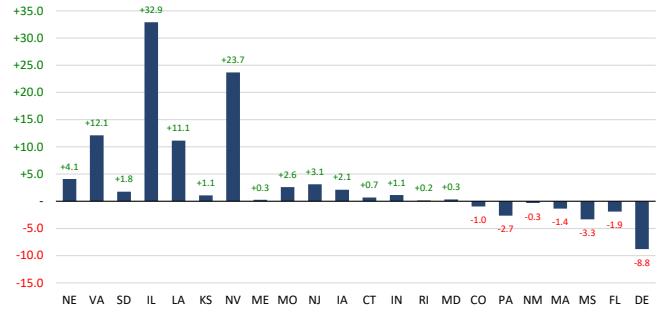

- The top 4 states are all due to an expanding install base.
- Delaware (-20.8%) is an outlier as the state's monthly data is the sum of either 4 or 5 weeks and is not like-for-like in this instance.

Exhibit 29 - June-26 US Slot GGR by State – YoY Growth

Source: UNLV, various state gaming bodies, E&P estimates

Exhibit 30 - June-26 US Slot GGR by State – YoY Growth (US$m)

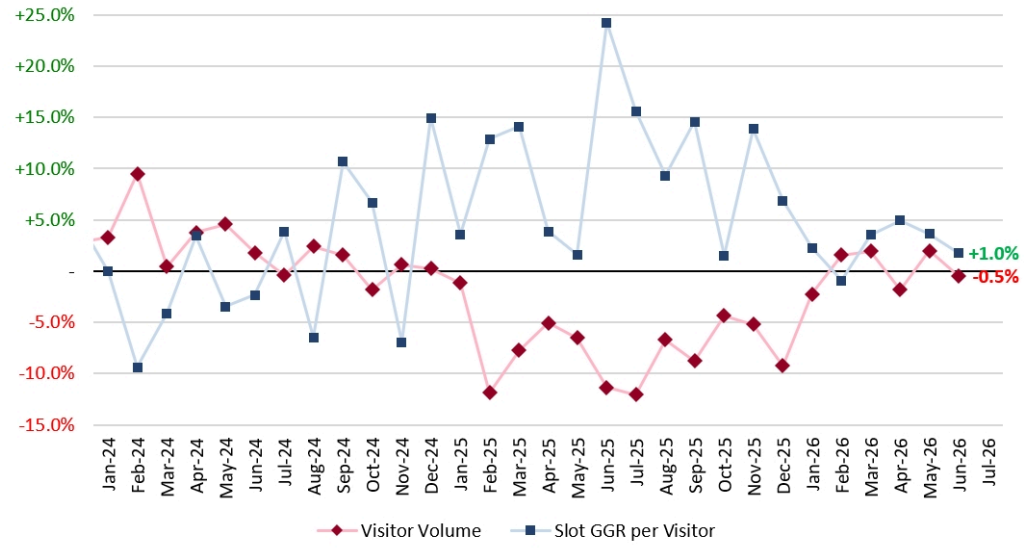

Source: UNLV, various state gaming bodies, E&P estimates.

Las Vegas

Las Vegas saw a material shift in its customer base in 2025.

- Visitor volumes lagged whilst spend per visitor (particularly VIP's) remained strong.
- YoY trends have normalised in CY26 as the comps began to cycle through.

July Data / New York Casino Conversion

New York weekly GGR data is a little bit noisy with the conversion of Resorts World New York City.

- However, when combined, July GGR numbers appear to be stable on average.

We believe there will be more upside over the coming months as another floor at Resorts World NYC opens up.

- Phase one of the conversion was completed in late April when the class III casino launched with ~2.5k slots/ETG's & ~250 tables.
- Last week the casino added another floor with an additional ~1.4k slots/ETG's (see here)

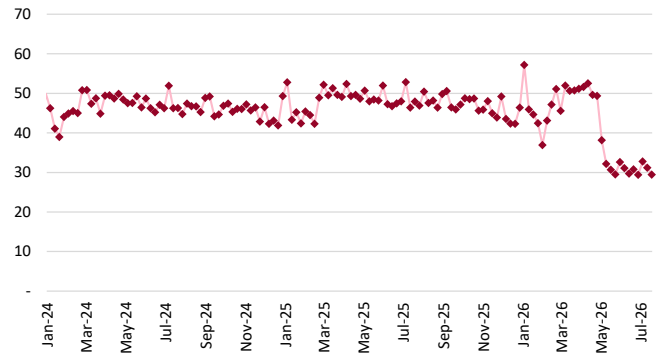

The new slots/ETG's at Resorts World New York City are currently generating 143% more win per unit per day than the VGM's pre-conversion (albeit on a smaller sample size).

- This is because class III slots are generally superior to VGM's due to fewer restrictions on math and more competition amongst suppliers. Resorts World NYC is also the only facility in New York City that can currently offer class III slots.

We previously detailed the casino conversion in our last quarterly report (see here), and specifically flagged that it would cause a one-off drag on LNW's lease footprint at their 1Q result.

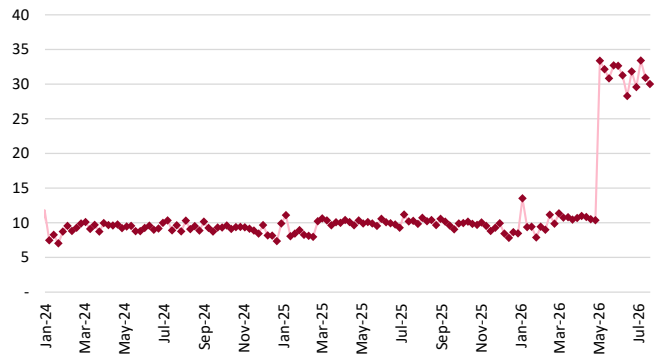

- Moving forward, the casino conversion will be a positive catalyst for both Aristocrat & LNW, due to the opening of the new floor mentioned above (+1.4k units) and when the full expansion is completed in 2030 (which will add another ~2.0k slots).

Land-Based Read-Throughs

At the time of writing, the following casino read-throughs have reported their results. We summarise these below:

Boyd Gaming

- Regional trends continue to be stronger than Las Vegas.
  - Regional Trends:
    - Continued strength in Core & Retail players.
    - Players to stay closer to home.
- Las Vegas Trends:
  - Continued softness from destination/out-of-town customers (since 3Q25).
    - Strong play from VIP's at premium locations and from locals at non-Strip locations.
  - June was a little softer than the other months but shouldn't be considered a read-through of softer trends.
    - "April was fine. May was a little stronger. June was probably a little softer."
    - First three weeks of July have been consistent with 2Q26.
  - Comps are expected to become easier from 4Q26.
    - CY27 should see growth.
- Hard to isolate specific impacts as there are multiple catalysts each way.
  - Positive – Stronger tax refunds from the Big Beautiful Bill & stock market strength.
  - Negative – Higher airfares, higher gas prices, geopolitical concerns.

Churchill Downs

- Consumer trends improved both YoY & QoQ.
  - Higher-value rated play remains strong. Lower-value unrated segment consistent with prior-quarter trends.
- Exploring options to sell nine regional gaming properties (the majority of their gaming portfolio).
  - Will retain all locations with historical racing machines (HRM's) and will continue expanding HRM unit footprint.
  - HRM's play similarly to traditional slot machines from a player perspective but are based on math from historical race results.

MGM Resorts

- Las Vegas Trends:
  - Las Vegas is stabilising and growing.
    - April was strong. May was exceptionally strong, driven by events and other activity. June was more challenged due to the summer heat.
    - July has been good. Expect to see more ups and downs in 3Q and beyond. 3Q looks stronger than 4Q.
  - VIP's remain very strong. Properties that cater to locals are also doing well.
  - Low-end customers remain soft.
    - Have launched a new all-in package which has resonated well with value customers so far.
  - Booking cycles remain short.

        - International travel from Canada is down considerably and vehicle traffic from California remains soft.
    - Convention & catering businesses are performing at an all-time high due to the strength of corporate America.
        - Las Vegas has changed to be more events driven.
    - Slot hold had a favourable impact in the tens of millions.
- Regional Trends:
    - All-time best revenue quarter on a same-store basis.
        - Slot handle and slot win increased 4% and 3% respectively.
    - Continued strength led by premium players.
    - Seeing benefits from investments in high-limit gaming areas.
- Japan expansion remains on track for a 2030 opening.
    - MGM remains the only licensee and considers Japan the greatest greenfield opportunity in the world.

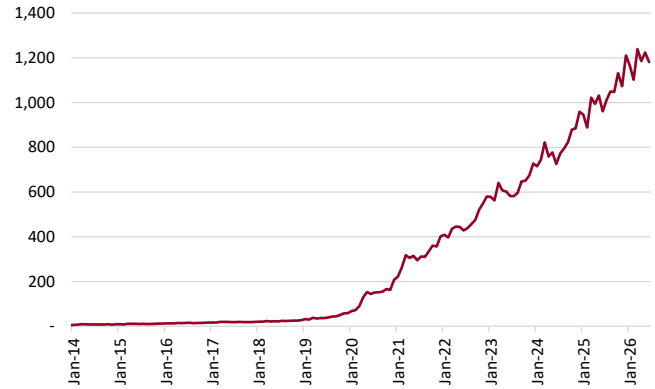

iGaming Trends

North American Online Casino is still growing at ~20% per year, although growth appears to be trending downward.

The latest state/province to launch was Alberta which went live on July 13.

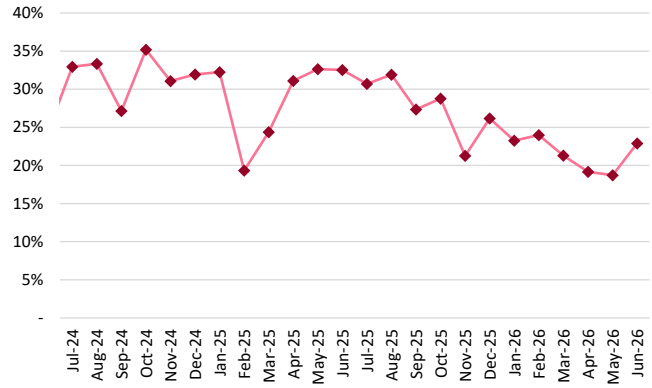

- We estimate that this will add ~6% to the North American iGaming TAM.
- Canada also represents a more favourable operating market for suppliers due to the lower tax rates.
- Both Aristocrat & LNW were live with content on day-1.

Exhibit 35 - North American Online Casino GGR (US$m)

Source: Eilers & Krejcik, various state gaming bodies, E&P Estimates

Exhibit 36 - North American Online Casino Growth (yoy)

Changes to Forecasts

We have made the following changes to our overall forecasts.

Aristocrat

- Increased near-term NA Net Adds & minor increase to FPD due to the strong performance of new games.
- Adjusted FX assumptions (positive impact).

Our valuation increases +11.2% to $70.64. We retain our Positive recommendation.

Light & Wonder

- Reduced near-term NA Net Adds based on the cadence of game releases.
- Pushed back some NA outright sales into 2H26 due to the launch of the Lightwave Solar Cabinet as an outright sale option and increased ASP for those periods.
- Reduced 2Q26 Grover Net Adds due to Indiana only adding a small amount to the total state install base throughout its 2nd live quarter.
- Reduced International Outright Sales in CY26 due to the new Cosmic Dual cabinet not increasing Australian market share as much as expected.
- Minor Downgrade to SciPlay.
- Decreased 2Q26 Buyback to reflect market updates.

Our valuation declines -7.7% to $181. We retain our Positive recommendation.

Our Forecasts vs Consensus

Light & Wonder

In aggregate, we are only marginally below consensus for LNW's 2Q26 headline numbers and for a few KPI's such as NA ex-Grover Net Adds & International Outright Sales.

In our last preview, we flagged the conversion of Resorts World NYC (see here), and as such, we were materially below consensus for NA ex-Grover Net Adds. We don't foresee any similar event occurring during this quarter.

RESEARCH RECOMMENDATION DEFINITIONS

Positive	Stock is expected to outperform the S&P/ASX 200 over the coming 24 months.
Neutral	Stock expected to perform in line with the S&P/ASX 200 over the coming 24 months.
Negative	Stock is expected to underperform the S&P/ASX 200 over the coming 24 months.
Speculative Buy	Stock has limited history from which to derive a fundamental investment view or its prospects are highly dependent on event risk, e.g. Successful exploration, scientific breakthrough, high commodity prices, regulatory change, etc. Consequently, the stock is considered a high-risk investment which may be prone to high volatility in share price movements, have a greater risk of capital loss and/or the stock may have low liquidity.
Suspended	Stock is temporarily suspended due to compliance with applicable regulatory and/or E&P policies in circumstances where E&P is acting in an advisory capacity.
Not Rated	Stock is not included in our investment research universe.

Research Criteria Definitions

Recommendations are primarily determined with reference to how a stock ranks relative to the S&P/ASX 200 on the following criteria:

Valuation	Composite of Rolling 12-month prospective multiples and discounted cash flow (DCF), or DCF for resource stocks.
Earnings Outlook	Forecast 2-year EPS growth.
Earnings Momentum	Percentage change in the current consensus EPS estimate for the stock (rolling 1-year forward basis) over the consensus EPS estimate for the stock 3 months ago.
Shareholder Returns	Composite of forecast ROE (rolling 1-year forward basis) and the percentage change in ROE over 2 years.
Debt Servicing Capacity	Rolling 12-month EBIT Interest Cover ratio.
Cyclical Risk	Qualitative assessment of the 2-year outlook for a stock/industry's profit cycle.
Industry Quality	Qualitative assessment of an industry's growth/returns potential and company specific management capability.
Financial Transparency	If we don't understand it, we won't recommend it.

For stocks where Evans and Partners does not generate its own forecasts, Bloomberg consensus data is used. Analysts can introduce other factors when determining their recommendation, with any material factors stated in the written research where appropriate.
